Choices & Changes G. Richard Ambrosius, 2006-04-06 For the first time in human history the prospect of living a long healthy and productive life has become a reality for the majority of people What was the privilege of the few has become the destiny of the many Robert Butler MD Gerontologist Choices and then to create criteria with which to distinguish between those categories age sex nationality race religion education etc As we do this the categories ultimately and often unconsciously shape our world view Retirement for example is a word stereotypically used to categorize that portion of life that occurs when one quits working and becomes old As such we tend to distinguish retirees from productive members of society We then help others distinguish these people by creating categories to describe places where they gather senior centers or dwell retirement communities healthcare centers assisted living communities or 50 communities Retirement is that magical time of life when the focus somehow shifts from who you are and what you do to what you once did and who you used to be as if all your experience is at once inaccessible to the person you've become How does this type of prejudice occur Where does it come from Let's examine the word Various dictionaries offer multiple definitions of the word retirement To go away retreat or withdraw to a private sheltered or secluded place To go to bed To give ground as in battle retreat withdraw To give up one's work business or career especially because of advancing age To move back or away or seem to do so You probably have noticed most of these definitions focus on quitting going away withdrawing from or giving up Retirement implies that your self worth and your worth to society are a thing of the past Such an implication is negative unfounded and dangerous to one's health It is fine to retire for the evening but it is not fine to retire from life simply because of some mindless designation While retirement may have been an appropriate descriptor of later life during the industrial age when very few people lived into their 60s and 70s the term is no longer relevant when applied to today's active healthy and well educated older adults Perhaps it is time to retire words like retirement retired or retiree when referring to people in life's second half just as we have retired other words used to categorize and demean minorities and women over the years I have been railing a *Second Careers*
