New Borders for a Changing Europe James Anderson, Liam O'Dowd, Thomas M. Wilson, 2003 As Europe's internal and external borders change states become defensive This is a study of identity economic integration governance and communication between states

OECD Multi-level Governance Studies Building More Resilient Cross-border Regions Considerations in Governance and Partnerships OECD, 2024-12-18 Supporting the development of cross border regions is a growing priority for many governments across the OECD This reflects the fact that these regions often face significant development challenges related to their proximity to national borders which can constrain regional economic development impede the delivery of cross border services and hamper the co ordination of cross border disaster management This report assesses how multi level governance arrangements can support resilient cross border development It starts by examining why the development of cross border regions in the EU often lags behind non border regions and the multi level governance mechanisms in place to bolster their performance Using the five pilot regions as a basis it then examines cross border governance arrangements through the lens of the OECD Cross border Governance Framework Finally this report includes considerations for subnational national and international policy makers in the OECD and beyond on how they can strengthen cross border governance frameworks and enhance the resilience and socio economic development of cross border areas

Europe's Changing Geography Nicola Bellini, Ulrich Hilpert, 2013-08-21 European macro regions Euroregions and other forms of inter regional cross border cooperation have helped to shape new scenarios and new relational spaces which may generate opportunities for economic development while redefining the political and economic meaning of national borders This book is based on a number of key case studies which are crucial to understanding the complex web of political economic and cultural factors that shape the heterogeneous picture of Europe's new geography This book provides a fresh view on this phenomenon with a realistic approach shedding light on its complexity as well as on its ambiguities The new macro regions are interpreted with an approach recognizing the importance of institutionalization but also their flexible configuration and blurred borders The book also raises the issue of credibility and legitimacy arguing that inter regional cooperation has to be removed from the foggy realm of the exchanges between local political and bureaucratic elites in order to be clearly and concretely motivated and functional to key strategic objectives of the regions Finally the authors suggest a complementarity between relations based on proximity and wider possibly global networks where some territories and especially metropolises find opportunities based on virtual proximity Europe's Changing Geography provides a substantial re appraisal of a key phenomenon in the process of European integration today It will be of interest both to scholars of the political economy of European regionalism and to practitioners

The EU's Shifting

Borders Klaus Bachmann, Elzbieta Stadtmüller, 2012-03-12 The EU's internal borders have become mostly invisible. Today external borders are at the centre of controversy about an alleged fortress Europe. Using different theoretical and methodological perspectives, this book examines the challenges facing the EU's external borders, including Neighborhood Policy, migration issues, and the diffusion of norms and values to other countries. Divided into two parts, the book first presents different theoretical approaches and empirical studies of the EU's external borders, mobility and security issues. It is an invaluable guide to border research within a framework of European Integration and Globalization Studies. The second part of this volume focuses on the analyses of the EU's Neighbourhood Policy, the approach to Eastern Europe, and EU energy policy. Expert contributors collaborate to explore debates about migration, the EU as a normative civil power, energy security, and the securitization of borders. Highly relevant and insightful, the text provides a timely assessment of EU borders in an increasingly globalized and integrated European neighbourhood. The EU's Shifting Borders will be of interest to students and scholars of European Union Politics and International Relations. *The Effects of Europeanization on the Integration Process in the Upper Adriatic Region* Elisabetta Nadalutti, 2015-05-07 This book examines the effects of Europeanization on two cross-border states, Italy and Slovenia, in the period between 1990 and 2012. It does so by means of an analysis of specific funding programmes such as Interreg and Phare. The book explores whether Europeanization through cross-border cooperation has promoted a post-national mode of governance and new relations between the national, the supra-national, and the local/regional level. It discusses whether a link can be established between the activities of sub-national actors, municipalities, regions, and the recent development of legal instruments designed to enhance cross-border cooperation. Taking the perspective of citizenship and focusing on ethnic minority groups and cultural/social associations, the book addresses the question of whether a new notion of citizenship, multi-layered and multi-dimensional, has emerged in cross-border areas through cross-border cooperation. *The European's Burden* Salvatore Engel-Di Mauro, 2006 Textbook **Participatory Governance in the Europe of Cross-Border Regions** Peter Ulrich, 2021-02-24 This policy analysis examines geopolitical and sociocultural bordering practices in Europe's cross-border regions and their impact on civil society participation and governance in state peripheries. The normative hope of democratisation and the legitimisation of European politics in European Union border regions are connected with a greater degree of cross-border citizen engagement in Euroregional institutions and politics. Using the example of the European Grouping of Territorial Cooperation, this study analyses and compares four cross-border Euroregional case studies: Tyrol-South Tyrol-Trentino, Galicia-North Portugal, Saar-Moselle, and the planned German-Polish Trans-Oder/Elbe. *The Border Multiple* Dorte Jaegtic Andersen, Martin Klatt, Marie Sandberg, 2016-03-23 Addressing and conceptualizing the changing character of borders in contemporary Europe, this book examines developments occurring in the light of European integration processes and an on-going tightening of Europe's external borders. Moreover, the book suggests new ways of investigating the nature of European borders by looking at border

practices in the light of the mobility turn and thus as dynamic multiple diverse and best expressed in everyday experiences of people living at and with borders rather than focusing on static territorial divisions between states and regions at geopolitical level It provides border scholars and researchers as well as policymakers with new empirical and theoretical evidence on the de and re bordering processes going on in diverse border regions in Europe both within and outside of the EU

Shared sovereignty and denationalisation of statehood in the European Union Fabrizio Capogrosso, 2009-02-06 Seminar paper from the year 2008 in the subject Politics Topic European Union grade 1.3 European University Viadrina Frankfurt Oder language English abstract Although the process of globalisation is an old dated phenomenon which can be settled back to the first intercontinental commercial exchanges of Strieck 2005 only recent events have modified the traditional relation among nation states The collapse of the Berlin wall and the downfall of the USSR the growth of the Pacific Asian economies and the expansion of new communication systems have dissolved the conventional threefold partition of the globe in the idea of a one world structured on an axis organised in three principal regional blocks North America Western Europe and Pacific Asia cf Taylor Flint 2000 4.5 Globalisation has altered all core tasks of the nation state concerning territoriality taxation and citizenship The formulation of policies has shifted from the national context to a complex environment which embraces the regional and international dimension These circumstances have affected the representative role of the state as decisional system and have led to a situation in which sovereignty is shared among multiple actors who have to deal with new sources of legitimisation beyond the domestic environment cf Luhmann 1994 15.20 Thus traditional foundations for the political order are destabilized due to the fact that vertically organised national cultures and national economies are gradually being replaced by new horizontal and global networks van Ham 2001 37.8 From this angle the European Union hereafter also EU or Union could be conceived as a regional answer to the process of globalisation in which European integration is adapting European societies economies and political organisations to a globalised competitive rule system cf van Ham 2001 Nevertheless if the understanding of the EU

as a regional variant to globalisation explains the necessity of European integration it leaves ground for questions regarding the changes in the relationship between governance and government Moreover assumed that European integration owing its intergovernmental bias is chiefly managed by national executives cf Moravcsik 1993 a multi level system of governance undermines the core functions of governments as principal linkage between the institutional level of decision making and the society cf Poguntke 2000 In this dissertation I will evaluate at the example of the European Union the hypothesis that governance has eclipsed government The intention is to analyse if the European decisional system has destabilized the role of national governments and eroded the classical link between national institutions and society Furthermore I will analyse to which degree these supposed changes are to be ascribed to the institutional configuration of the European Union *Law and New Governance in the EU and the US* Gráinne de Búrca, Joanne Scott, 2006-03 This book pursues effective mechanisms for addressing complex social problems and the challenges they raise for our understanding of law
