Crossfire Education:

Crossfire Education William Amos Jordan, 1996 This book discusses public education reform in the United States The author focuses on the relationship between education and a dynamic culture He proposes three metaphors which reveal the cultural breaks in the educational system The metaphors are mind as muscle mind as machine and mind as a technological system Jordan also provides a matrix in order to analyze education's relation to culture and societal changes Through his probing discussion the author poses questions designed to make the reader think intuitively He presents solutions but claims that real solutions must come from the people in the community This work is a look at educational theory that calls for a revolution in our system Jordan's enlightening work furnishes a fresh and positive look at what we can do about education culture and society

Boley, 2014-05-18 Crossfire in Professional Education Students the Professions and Society consists of papers collected at a conference of the above subject held in Evanston Illinois on October 16 17 1975 This collection of papers explores the pressures and conflicts to which professional education is subject The focus is on problems facing professional schools that play significant roles in society One paper discusses society technology and professional expertise and then tries to answer the question of balancing the opposing tensions between technology and human values present in the professions This paper outlines the university structure and the crisis of professional education including the responsibilities of the university composed of students professions and some elements of society Another paper discusses the contradictions facing universities as places for both scholarly learning and education for action One paper tackles the purpose of graduate education while another paper discusses the negative perception of lawyers in society stemming from the fact that some professional qualities are not developed in law schools This text concludes that professional education should respond to the needs of quality instead of just to any kind of growth This book is suitable for academicians educators university and college administrators as well as to members of the higher educational professions

The Principal's Office Kate Rousmaniere, 2013-09-17 The Principal's Office is the first historical examination of one of the most important figures in American education Originating as a head teacher in the nineteenth century and evolving into the role of contemporary educational leader the school principal has played a central part in the development of American public education A local leader who not only manages the daily needs of the school but also represents district and state officials the school principal is the connecting hinge between classroom practice and educational policy Kate Rousmaniere explores the cultural economic and political pressures that have impacted school leadership over time and considers professionalization the experiences of women and people of color and progressive community initiatives She discusses the intersections between the role of the school principal with larger movements for civil rights parental and community activism and education reform The school principal emerges as a dynamic character in the center of the educational enterprise ever maneuvering between multiple constituencies responding to technical and bureaucratic demands

and enacting different leadership strategies By focusing on the historic development of school leadership this book provides insights into the possibilities of school improvement for contemporary school leaders and reformers **Global Learning**

and International Development in the Age of Neoliberalism Stephen McCloskey, 2021-10-13 This book argues that the international development sector is in crisis which can be mostly sourced to its side stepping the dominant development question of our age the neoliberal growth paradigm It argues that this crisis can be addressed at least in part by the sector's re engagement with the radical development education process that it helped to foster and sustain for over two decades The recent safeguarding scandal is symptomatic of a sector that is becoming overly hierarchical brand conscious and disconnected from its base This book argues that many of the problems the sector is facing can be sourced to its failings in grappling with the question of neoliberalism and formulating a coherent critique of how market orthodoxy has accelerated poverty in the global North and South This book recommends re embracing the radical origins of global learning situated in the participative methodology and praxis reflection and action of Paulo Freire both as internal capacity building and external public engagement The book proposes a new development paradigm focusing on bottomup participative approaches to policy making based on the needs of those NGOs claim to represent the poor marginalised and voiceless rather than constantly following the agenda of donors and governments The recommendations made by this book will serve as an important resource for researchers and students of international development and global learning as well as to NGOs civil society activists and education practitioners looking for solutions to the problems within the sector **Commonsense Methods for**

Children with Special Needs Peter S. Westwood, 1997 This is a book that should be required reading for all Secretaries of State for Education It was easy to read and ought to find a place in as many staff libraries as possible Education Review

The Reorganization of Education in Prussia ,1927 Educational Reform Jordan T. Ville,2001 This book brings together the literature in a field which may define the 21st century Can economic and technological progress continue with educational systems which seem to answer to no one but themselves and which output graduates who can barely read and write and who have only the faintest clue how to use a map This bibliography provides access via Title Author and Subject Indexes Contents Educational Accountability Educational Change Educational Equalisation Educational Leadership Educational Planning Educational Indicates

Education ,1973 *In the Crossfire* John P. Spencer,2012-08-16 As media reports declare crisis after crisis in public education Americans find themselves hotly debating educational inequalities that seem to violate their nation s ideals Why does success in school track so closely with race and socioeconomic status How to end these apparent achievement gaps In the Crossfire brings historical perspective to these debates by tracing the life and work of Marcus Foster an African American educator who struggled to reform urban schools in the 1960s and early 1970s As a teacher principal and superintendent first in his native Philadelphia and eventually in Oakland California Foster made success stories of urban schools and children whom others had dismissed as hopeless only to be assassinated in 1973 by the previously unknown Symbionese Liberation Army in a bizarre protest against an allegedly racist school system Foster s story encapsulates larger social changes in the decades after World War II the great black migration from South to North the civil rights movement the decline of American cities and the ever increasing emphasis on education as a ticket to success Well before the accountability agenda of the No Child Left Behind Act or the rise of charter schools Americans came into sharp conflict over urban educational failure with some blaming the schools and others pointing to conditions in homes and neighborhoods By focusing on an educator who worked in the trenches and had a reputation for bridging divisions In the Crossfire sheds new light on the continuing ideological debates over race poverty and achievement Foster charted a course between the extremes of demanding too little and expecting too much of schools as agents of opportunity in America He called for accountability not only from educators but also from families taxpayers and political and economic institutions His effort to mobilize multiple constituencies was a key to his success and a lesson for educators and policymakers who would take aim at achievement gaps without addressing the full range of school and nonschool factors that create them
