A Research Agenda for Flexible Working Arrangements Lilian M. de Menezes, Clare Kelliher, 2025-10-07 Bringing together leading international researchers this Research Agenda adeptly navigates the evolving landscape of flexible working arrangements and identifies potential avenues for further research *Masculinity, Marriage and Rural Men in Urban China* Sarah Gosper, 2024-12-31 This book explores the conjuncture and interrelationship between three so called crises facing Chinese society a crisis of marriage a crisis of masculinity and a crisis of mobility Based on sustained ethnographic research on unmarried lower class rural men from two distinct social and class categories namely migrant workers employed in the food delivery and express mail delivery industries and tertiary educated white collar professionals the book reveals how the increasing socio economic precarity of rural men and their largely unrealised desires to marry and have children demonstrates a fundamental reconfiguration of Chinese masculinity and mobility in urban China and the social impact on central Chinese institutions The book also reveals the futile efforts to fulfil hegemonic models of masculinity in contemporary China and addresses the heterogeneity of unmarried lower class rural men as they navigate marriage manhood and mobility Exploring gender relations in China and contributing to global studies of heterosexual masculinities this book will appeal to students and scholars of Chinese culture and society gender studies and social anthropology **The Routledge**

Companion to Mental Health at Work Arla Day, Cary L. Cooper, 2023-10-12 The issue of mental health at work has become a hot topic in both the popular media and academic writings Although job stress and mental ill health are associated with negative outcomes for individuals teams and organizations there has been some suggestion that changing the work environment and creating healthy workplaces can improve worker health Much of the current works in the general of health is fractured coming from a variety of disciplines and perspectives without an organizing framework to help guide research and practice in the area Having this individualized compartmentalized perspective constrains our ability to fully understand the scope of the issue the key factors in supporting or detracting from one's mental health and interventions focusing on mental health at work Given the importance of understanding mental health at work and the current lack of coverage on workplace mental health there is a need for a book to provide a holistic overview of the issue targeting the environmental individual and group influences of mental health and well being as well as the impact on individuals and workplaces This handbook provides a conceptual framework for examining these issues Each chapter offers an in depth examination of the key facets of mental health at work focusing both on the seminal and current literature on the topic and practical suggestions for best practices for organizations With contributions from leading experts authors address the state of the art research and integrate current events that are shaping the way we work and our wellbeing at work This edited collection will be of interest to researchers academics policymakers and advanced students in the fields of human resource management organizational psychology and management *Joining Forces for Gender Equality What is Holding us Back?* OECD, 2023-05-09 OECD

Effects of the Covid-19 Pandemic on Employee Well-Being Raida Abu Bakar,Rosmawani Che Hashim,Man Chung Low,Mohammad Rezaur Razzak,Sharmila Jayasingam,2023-03-30 This book contributes toward the understanding of the human experience at work during the pandemic and its implications on employee well being in the context of Malaysia a developing economy with its own set of unique challenges Very little research has been done about this issue to date particularly in Malaysia This book aims to bridge this gap by examining the Malaysian perspective of the concept of employee well being in detail with the overarching goal of serving as a guide toward overcoming the challenges wrought on by the ever changing post pandemic environment Different conditions and experiences are discussed to contextualize the unique ways in which individuals react to difficulties with an emphasis on how organizations can assist at a micro level to allow employees to overcome such difficulties

Littell's Living Age ,1882 **Parliamentary Papers** Great Britain. Parliament. House of Commons,1909 **American Machinist** ,1904 Employee Retention in Change Management Processes. Practical Experience Michael Kurwan,2023-04-21 Document from the year 2023 in the subject Leadership and Human Resources Leadership language English abstract Retaining employees for the long term within the framework of change management processes is a challenging management task In change management processes a fundamental distinction must be made between incremental change management and radical change management While incremental change happens continuously and is integrated into everyday work radical change represents a strategic realignment of the company which is predominantly associated with staff reductions and is intended to change the corporate culture This is particularly true in the case of turnarounds where cost cutting programs play a crucial role in ensuring the long term survival of the company Employees are more willing to go along with incremental change also known as continuous improvement than with radical change as these could also be affected by staff reductions This stirs up fears among employees and therefore often leads to high turnover Therefore it is important for management to actively involve employees in the changes to empower them to act as change agents so that they can actively shape the change To do this it is crucial to

identify the key personnel that a company cannot do without The management and key personnel are given the task of actively accompanying the company s employees on the journey of change so that the company can grow sustainably again from a lower level after the strategic realignment so that the remaining employees have a prosperous future Open communication and excellent transparency on the part of the management which should also act as a unit help to bring the employees along on the change journey in a targeted manner However experience has shown that 50% of all change management projects in the industry fail and 20% are implemented inadequately due to two crucial reasons namely power struggles within management and resistance from employees For this reason it is imperative that a company s management team select a leadership coalition of similarly rational members who also have sufficient empathy to successfully manage the change management process which must be done together with employees and should not be directed against them The guiding coalition should develop a common strategic vision and practice a participative way of working involving everyone since the goal of transformation is to change the thinking of employees and transformation can only be brought about together with employees
