Multidisciplinary Approaches in AI, Creativity, Innovation, and Green Collaboration Fields, Ziska, 2023-05-01 Creativity must be turned into innovation that adds value and leads to strategic action Innovation is often associated with Silicon Valley expensive research and development departments and expensive commercialization that primarily benefits a small portion of the world's population A small portion of the world's population working together to solve wicked green problems is not enough either Green creativity and eco innovation are necessary to help solve green problems by making products and services available and affordable to the masses *Multidisciplinary Approaches in AI Creativity Innovation and Green Collaboration* focuses on the importance of green creativity eco innovation and collaboration to create a more sustainable world It builds on the available literature and joint expertise in the field of management while providing further research opportunities in this dynamic field Covering topics such as eco leadership green marketing and social responsibility communication this premier reference source is a comprehensive and timely resource for government officials decision makers business leaders and executives students and educators of higher education librarians researchers and academicians

AI for Behavioural Science Stuart Mills, 2022-12-08 This book is a concise introduction to emerging concepts and ideas found at the intersection of contemporary behavioural science and artificial intelligence The book explores how these disciplines interact change and adapt to one another and what the implications of such an interaction are for practice and society *AI for Behavioural Science* book begins by exploring the field of machine behaviour which advocates using behavioural science to investigate artificial intelligence This perspective is built upon to develop a framework of terminology that treats humans and machines as comparable entities possessing their own motive power From here the notion of artificial intelligence systems becoming choice architects is explored through a series of reconceptualisations The architecting of choices is reconceptualised as a process of selection from a set of choice architectural designs while human behaviour is reconceptualised in terms of probabilistic outcomes The material difference between the so called manual nudging and automatic nudging or hypernudging is then explored The book concludes with a discussion of who is responsible for autonomous choice architects

Four Battlegrounds Paul Scharre, 2023-02-28 An NPR 2023 Books We Love Pick One of the Next Big Idea Club's Must Read Books An invaluable primer to arguably the most important driver of change for our future P W Singer author of *Burn In* An award winning defense expert tells the story of today's great power rivalry the struggle to control artificial intelligence A new industrial revolution has begun Like mechanization or electricity before it artificial intelligence will touch every aspect of our lives and cause profound disruptions in the balance of global power especially among the AI superpowers China the United States and Europe Autonomous weapons expert Paul Scharre takes readers inside the fierce competition to develop and implement this game changing technology and dominate the future *Four Battlegrounds* argues that four key elements define this struggle data computing power talent and institutions Data is a vital

resource like coal or oil but it must be collected and refined Advanced computer chips are the essence of computing power control over chip supply chains grants leverage over rivals Talent is about people which country attracts the best researchers and most advanced technology companies The fourth battlefield is maybe the most critical the ultimate global leader in AI will have institutions that effectively incorporate AI into their economy society and especially their military Scharre's account surges with futuristic technology He explores the ways AI systems are already discovering new strategies via millions of war game simulations developing combat tactics better than any human tracking billions of people using biometrics and subtly controlling information with secret algorithms He visits China's National Team of leading AI companies to show the chilling synergy between China's government private sector and surveillance state He interviews Pentagon leadership and tours U S Defense Department offices in Silicon Valley revealing deep tensions between the military and tech giants who control data chips and talent Yet he concludes that those tensions inherent to our democratic system create resilience and resistance to autocracy in the face of overwhelmingly powerful technology Engaging and direct Four Battlegrounds offers a vivid picture of how AI is transforming warfare global security and the future of human freedom and what it will take for democracies to remain at the forefront of the world order
