Multidisciplinary Approaches in AI, Creativity, Innovation, and Green Collaboration Fields, Ziska, 2023-05-01

Creativity must be turned into innovation that adds value and leads to strategic action Innovation is often associated with Silicon Valley expensive research and development departments and expensive commercialization that primarily benefits a small portion of the world s population A small portion of the world s population working together to solve wicked green problems is not enough either Green creativity and eco innovation are necessary to help solve green problems by making products and services available and affordable to the masses Multidisciplinary Approaches in AI Creativity Innovation and Green Collaboration focuses on the importance of green creativity eco innovation and collaboration to create a more sustainable world It builds on the available literature and joint expertise in the field of management while providing further research opportunities in this dynamic field Covering topics such as eco leadership green marketing and social responsibility communication this premier reference source is a comprehensive and timely resource for government officials decision makers business leaders and executives students and educators of higher education librarians researchers and academicians

Federated Learning Mei Kobayashi, 2025-08-01 This book serves as a primer on a secure computing framework known as federated learning Federated learning is the study of methods to enable multiple parties to collaboratively train machine learning AI models while each party retains its own raw data on premise never sharing it with others This book is designed to be accessible to anyone with a background in undergraduate applied mathematics It covers the basics of topics from computer science that are needed to understand examples of simple federated computing frameworks It is my hope that by learning basic concepts and technical jargon from computer science readers will be able to start collaborative work with researchers interested in secure computing Chap 1 provides the background and motivation for data security and federated learning and the simplest type of neural network Chap 2 introduces the idea of multiparty computation MPC and why enhancements are needed to provide security and privacy Chap 3 discusses edge computing a distributed computing model in which data processing takes place on local devices closer to where it is being generated Advances in hardware and economies of scale have made it possible for edge computing devices to be embedded in everyday consumer products to process large volumes of data quickly and produce results in near real time Chap 4 covers the basics of federated learning Federated learning is a framework that enables multiple parties to collaboratively train AI models while each party retains control of its own raw data never sharing it with others Chap 5 discusses two attacks that target weaknesses of federated learning systems 1 data leakage i e inferring raw data used to train an AI model by unauthorized parties and 2 data poisoning i e a cyberattack that compromises data used to train an AI model to manipulate its output **Empire of AI** Karen Hao, 2025-05-20 An Instant New York Times Bestseller A bestselling page turner that has made waves not just in Silicon Valley but around the world With Empire of AI Hao is fundamentally shaping many people s perceptions and understanding

of the company at the center of the AI revolution TIME Magazine TIME100 AI 2025 Excellent and deeply reported Tim Wu The New York Times Startling and intensely researched an essential account of how OpenAI and ChatGPT came to be and the catastrophic places they will likely take us Vulture Hao's reporting inside OpenAI is exceptional and she's persuasive in her argument that the public should focus less on AI's putative sentience and more on its implications for labor and the environment Benjamin Wallace Wells New Yorker From a brilliant longtime AI insider with intimate access to the world of Sam Altman's OpenAI from the beginning an eye opening account of arguably the most fateful tech arms race in history reshaping the planet in real time from the cockpit of the company that is driving the frenzy When AI expert and investigative journalist Karen Hao first began covering OpenAI in 2019 she thought they were the good guys Founded as a nonprofit with safety enshrined as its core mission the organization was meant its leader Sam Altman told us to act as a check against more purely mercantile and potentially dangerous forces What could go wrong Over time Hao began to wrestle ever more deeply with that question Increasingly she realized that the core truth of this massively disruptive sector is that its vision of success requires an almost unprecedented amount of resources the compute power of high end chips and the processing capacity to create massive large language models the sheer volume of data that needs to be amassed at scale the humans cleaning up that data for sweatshop wages throughout the Global South and a truly alarming spike in the usage of energy and water underlying it all The truth is that we have entered a new and ominous age of empire only a small handful of globally scaled companies can even enter the field of play At the head of the pack with its ChatGPT breakthrough how would OpenAI resist such temptations Spoiler alert it didn't Armed with Microsoft's billions OpenAI is setting a breakneck pace chased by a small group of the most valuable companies in human history toward what end not even they can define All this time Hao has maintained her deep sourcing within the company and the industry and so she was in intimate contact with the story that shocked the entire tech industry Altman's sudden firing and triumphant return The behind the scenes story of what happened told here in full for the first time is revelatory of who the people controlling this technology really are But this isn't just the story of a single company however fascinating it is The forces pressing down on the people of OpenAI are deforming the judgment of everyone else too as such forces do Naked power finds the ideology to cloak itself no one thinks they're the bad guy But in the meantime as Hao shows through intrepid reporting on the ground around the world the enormous wheels of extraction grind on By drawing on the viewpoints of Silicon Valley engineers Kenyan data laborers and Chilean water activists Hao presents the fullest picture of AI and its impact we've seen to date alongside a trenchant analysis of where things are headed An astonishing eyewitness view from both up in the command capsule of the new economy and down where the real suffering happens Empire of AI pierces the veil of the industry defining our era **The Mind of Everyday** Petraq Papajorgji, Howard Moskowitz, 2024-12-28 The advent of artificial intelligence AI is associated with relevant changes in how we live today AI has the potential to significantly enhance daily decision making by providing tailored data dependent

insights and aiding in intricate analysis AI based systems will be around us helping and advising us in our everyday tasks However how well do these systems perform in their quest to replace the human brain A meter a procedure for comparing the outcomes obtained by artificial intelligence systems with those obtained by human systems is necessary to address this issue This meter is Mind Genomics a new emerging science that delves into the science of how we as humans organize and respond to information To evaluate whether there are differences in the results obtained by AI based systems and human based experiments based on Outer Psychophysics were designed and implemented Thus four experiments in crucial areas of our lives are selected and cover education family stress and environmental and governmental policies For each area a Mind Genomic experiment is designed defining four topics silos Then the elements contained in each of the silos were generated twice once by humans and then by an AI based system Evaluating both systems performance requires comparing the results obtained by both experiments The analysis of the study cases is disciplined rich in scientific tools and presented with methods Through a blend of theoretical exploration case studies and practical applications this book aims to inspire readers with the potential of the fusion of Mind Genomics and AI to empower innovation enhance user experiences and bring forth a more nuanced understanding of human thought Whether the reader is a student a researcher in the field of social and political sciences or simply curious about the evolving landscape of science and technology we hope this book will serve as an invitation to explore how we can harmonize human and machine intelligence to better navigate the complex world around us
