Strategy at Reddit comes a proven and thought provoking approach to the digital economy and how brands can create authentic engagement that is rooted in the fundamental motivations behind human psychology. Leading marketing practitioner and thought leader Joe Federer draws on evolutionary biology, anthropology, neuroanatomy and psychology as well as more than a decade of hands on experience to explain why people act so differently in various online spaces and what they are seeking from participating in each one. With a framework based on Freud's Id, Ego and Superego model of the human psyche, he demonstrates how the internet is a digital reflection of the collective human psyche and how different social networks correspond to different mindsets: platforms like Reddit to the unfiltered Id, Facebook and Twitter to the managed Ego, and Instagram to the ideal Superego. In the same way you behave differently when you're home alone, out with friends, communicating with family or interacting with coworkers, people act and express themselves differently in these various online spaces. Context matters. Understanding this will enable you to develop and execute effective engagement strategies to reach your target audiences on each social network. Learn how to create content that drives sharing and word of mouth, how brands can fit natively into different types of social channels, how to balance branded social presences across different networks, why authenticity will only grow in importance to consumers. Fascinating and deeply compelling. *The Hidden Psychology of Social Networks* will equip you to make vastly more efficient use of your media buys, establish more thoughtful strategies, develop better creative and in the end deliver more effective marketing that provides value.

ALL YOUR FRIENDS LIKE THIS is a topical, punchy and provocative look at how social networks are taking over the news. How do you get your news? Chances are not from a newspaper or the TV that's so old school. If you're anything like the rest of us, you get it from Facebook or Twitter. The great power shift from traditional media to social networks is happening right now. This boom means that for millions of us, our first exposure to information about the world comes from our friends, not news media. But social networks don't do news the old fashioned way. Because we share stories that make us look good, inspire us and fire us up, the tone and flavour of the news-making process is irrevocably altered. What does this mean for media? For journalists? The audience? Are we better off or worse off because of it? Highly topical, provocative and totally absorbing. ALL YOUR FRIENDS LIKE THIS does for the media what Freakonomics did for economics. If you're interested in the news, in what we read and why we read it, then this game-changing book is essential.
