Indigenous Teaching Disciplines and Perspectives for Higher Education Kgari-Masondo, Maserole

Christina,2025-03-28 Literature indicates that sociolinguists and educationists often claim multilingual practice and Africanizing and Indigenizing education will jeopardize national unity and social cohesion Such claims delay the implementation of decolonization policies and the transformation of the curriculum under false assumptions However research reveals many Indigenous students struggle with higher educational content which is often presented through languages that are unfamiliar to them This implies that there is a need to uncover resources that can assist in necessitating the implementation of Indigenous education globally and that all multilingual strategies in education must be based on quality mother tongue illustrative content as its foundation As a result further research on the subject is necessary to enhance teaching strategies that reach all Indigenous students Indigenous Teaching Disciplines and Perspectives for Higher Education illustrates the need for the implementation of a decolonized teaching and learning curriculum with integrated resources as models It explores how to improve Indigenous knowledge content and teaching methods Covering topics such as cultural identity African research methodology and Indigenous media this book is an excellent resource for teachers policymakers school administrators researchers scholars academicians and more Managing Innovation Inside

Universities Randolph Hall,2024-06-10 This book offers guidance on capturing the creative forces of the faculty staff and students at universities Given their unique and central role in America and the world it examines how university research learning and service can be integrated to address the needs of society as it is both enabled and changed by technology In turn the book assesses the challenges and opportunities for universities to be more successful and impactful through innovation viewing universities as integrated systems It demonstrates how change can occur both within the knowledge economy and because of innovations within it In doing so the book provides insights into how universities can prosper and lead in a world that is constantly changed by the innovations that universities and industry jointly create The book serves as a guide for higher education policymakers funders donors board members stakeholders and leaders chairs deans provosts presidents through its systematic vision for university innovation and service to society It will also benefit researchers studying innovation in organizations illustrating how systematic approaches arising from management science and operations research can be used toward positive change Lastly strategic partners in industry government and foundations seeking opportunities for partnerships and collaboration with universities will also find it useful **Start-up Wolf** Olivia

Yijian Liu,2024-05-28 Transnational entrepreneurs with technological know how have been promoted by the Chinese state and academic literature as a central force for regional development of industrial competitiveness But what motivates them and what do they experience and aspire to when building a start up in China This book answers these questions by examining how socially privileged entrepreneurial talents adopt and champion the wolf culture a fast paced competitive and aspirational

work culture that has become prevalent since China's mass promotion of entrepreneurship and innovation. Based on extensive field research including participant observation and interviews in Shenzhen's high tech industry, this book challenges the popular notion of entrepreneurship as entirely self-initiated and passion-driven. Outlining the concrete instruments of governance of the local state, the author argues that transnational talent from elite schools or elite professions is often entrepreneurial in China. Moreover, she argues that the different standards of selection of entrepreneurial talents by state and market actors create localised precarious conditions for them. This book offers fascinating insights into the contradictions inherent in the Chinese model of entrepreneurship. Start-up Wolf will appeal to scholars and students of China studies, the anthropology of entrepreneurship, science and technology studies, and economic geography, as well as business practitioners interested in innovation and high tech start-ups. Love the Journey to College Jill Madenberg, Amanda Madenberg, 2017-08-01 Jill Madenberg draws upon her 20-plus years of counseling experience while her daughter Amanda, a student who just recently went off to college, adds tips and personal stories. Whether you are wondering how to choose high school classes and activities, create a realistic college list, get the most out of a campus visit, or maintain a positive and healthy attitude, *Love the Journey to College* will help you make educated decisions throughout the process and show you how to do it with a smile. As the daughter of an experienced college counselor, Amanda Madenberg has been visiting colleges for as long as she can remember, on family vacations, weekend road trips, and school holidays. Even at a young age, she took interest as her mom spoke with tour guides, admissions counselors, and students on campus to get a feel for life at a particular school. Most importantly, Amanda greatly enjoyed her own college application process, from visiting campuses to writing supplemental essays. Writing as both a typical high school student and as the daughter of a college counselor, Amanda lends a unique and entertaining perspective to *Love the Journey to College*.

Walker, AI, 2025-02-27 Reactance Power Dynamics explores how psychological reactance that feeling of resistance when told

what to do can be transformed from a negative trait into a powerful tool This book delves into understanding reactance its roots in social psychology and how it manifests in everyday life For instance marketers can use this knowledge to craft campaigns that avoid triggering consumer resistance and educators can create more empowering learning environments The core idea is that reactance often seen as defiance is actually a drive to protect one's freedom The book examines power dynamics in relationships and societal structures revealing how imbalances can trigger reactance It challenges traditional motivational approaches that rely on direct persuasion which often backfire Did you know that reactance is fundamentally a drive to protect one's sense of freedom By understanding this you can learn to foster collaboration and empower others to choose their own paths The book progresses systematically first defining reactance and then exploring power dynamics before culminating in practical strategies for harnessing reactance This book offers a fresh perspective by emphasizing how to harness reactance as a motivational force It provides actionable strategies and real world examples relevant to various fields including marketing political science and education Ultimately Reactance Power Dynamics aims to equip readers with the tools to become more effective communicators negotiators and influencers while also addressing the ethical considerations of using these principles *Barron's Profiles of American Colleges*, 2005 The American Magazine, 1916

Musical Courier and Review of Recorded Music, 1921 Distribution in Japan Yoshirō Miwa, Kiyohiko Nishimura, J. Mark Ramseyer, 2002 Several years have passed since the store wars over barriers to foreign products at Japanese distribution firms Yet among English speaking readers how these firms operate remains a puzzle In this book the best Japanese scholars in their fields attempt to unravel that puzzle Avoiding culture based explanations they employ a systematic and rigorous economic logic yet since they also avoid mathematical notation the argument remains accessible to generalist readers Collectively the authors make four basic points Within a country distribution is less similar than it appears Not only does it vary enormously across industries but it often varies within a given industry as well Across countries distribution is less diverse than it appears Although appearances sometimes suggest major cross national contrasts on more careful analysis the differences often disappear Distribution sometimes depends on the product involved Because distribution functions as the principal means by which manufacturers acquire information about consumer preferences the character of distribution can depend crucially both on demand patterns and on manufacturing technology In the absence of regulatory intervention distribution generally will be efficient and non exclusionary Regulation usually introduces inefficiency and often creates barriers to entry Importantly however the targets of exclusion will less often involve foreign than domestic competitors To illustrate these points the authors draw on both analyses that cross various sectors and analyses that are specific to sectors they study both regulated and unregulated industries they describe industries with extensive imports industries with extensive exports and industries with neither they examine the effect of technological change and they introduce a variety of case studies from agriculture and automobiles to electrical appliances and apparel The Chronicle of Higher Education
