A Beginner's Guide to Introduce Artificial Intelligence in Teaching and Learning Muralidhar Kurni, Mujeeb Shaik Mohammed, Srinivasa K G, 2023-06-28 This book reimagines education in today's Artificial Intelligence AI world and the Fourth Industrial Revolution. Artificial intelligence will drastically affect every industry and sector, and education is no exception. This book aims at how AI may impact the teaching and learning process in education. This book is designed to demystify AI for teachers and learners. This book will help improve education and support institutions in the phenomena of the emergence of AI in teaching and learning. This book presents a comprehensive study of how AI improves teaching and learning from AI-based learning platforms to AI-assisted proctored examinations. This book provides educators, learners, and administrators on how AI makes sense in their everyday practice. Describing the application of AI in ten key aspects, this comprehensive volume prepares educational leaders, designers, researchers, and policymakers to effectively rethink the teaching and learning process and environments that students need to thrive. The readers of this book never fall behind the fast pace and promising innovations of today's most advanced learning technology.

Higher Education: Handbook of Theory and Research Laura W. Perna, 2025-01-30 Published annually since 1985, the Handbook series provides a compendium of thorough and integrative literature reviews on a diverse array of topics of interest to the higher education scholarly and policy communities. Each chapter provides a comprehensive review of research findings on a selected topic, critiques the research literature in terms of its conceptual and methodological rigor, and sets forth an agenda for future research intended to advance knowledge on the chosen topic. The Handbook focuses on a comprehensive set of central areas of study in higher education that encompasses the salient dimensions of scholarly and policy inquiries undertaken in the international higher education community. Each annual volume contains chapters on such diverse topics as research on college students and faculty organization and administration, curriculum and instruction, policy, diversity issues, economics and finance, history and philosophy, community colleges, advances in research methodology, and more. The series is fortunate to have attracted annual contributions from distinguished scholars throughout the world.

Everyday Automation Sarah Pink, Martin Berg, Deborah

Lupton, Minna Ruckenstein, 2022-05-09 This Open Access book brings the experiences of automation as part of quotidian life into focus. It asks how, where, and when automated technologies and systems are emerging in everyday life across different global regions. What are their likely impacts in the present and future? How do engineers, policy makers, industry stakeholders, and designers envisage artificial intelligence (AI) and automated decision making (ADM) as solutions to individual and societal problems? How do these future visions compare with the everyday realities, power relations, and social inequalities in which AI and ADM are experienced? What do people know about automation, and what are their experiences of engaging with actually existing AI and ADM technologies? An international team of leading scholars bring together research developed across anthropology, sociology, media and communication studies, and ethnology, which shows how, by rehumanising automation, we can gain deeper understandings of its societal impacts. The Open Access version of this book is available at <http://www.taylorfrancis.com> and has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license.

**Higher Education's Road to Relevance** Susan A. Ambrose, Laura A. Wankel, 2019-11-20 Explores the current context, role, and challenges of post secondary education and presents options for promising pathways forward. The post secondary educational system has undergone dramatic changes and experienced immense stress in the past two decades. Once regarded as the logical next step toward career opportunities and financial security, higher education is a subject of growing uncertainty for millions of people across the United States. It is more common than ever to question the return on investment, skyrocketing cost, and student debt burden of going to college. Prospective students and many employers increasingly view attending institutions of higher learning as inadequate preparation for entering the 21st century workforce. High profile scandals, financial impropriety, sexual abuse, restrictions of free speech, among others, have further eroded public trust. In response to these and other challenges, leading voices are demanding strengthened accountability and measurable change. *Higher Education's Road to Relevance* illustrates why change is needed in post secondary education and offers practical solutions to pressing concerns. The authors, internationally recognized experts in college level teaching and learning innovation, draw heavily from contemporary research to provide an integrative approach for post secondary faculty, staff, and administrators of all levels. This timely book helps readers identify the need for leadership in developing new networks and ecosystems of learning and workforce development. This valuable book will help readers understand the forces driving change in higher education, develop multiple pathways to create and credential self directed learners, promote access to flexible, cost effective, and relevant learning, adapt structures and pedagogies to address issues and overcome challenges, use an inclusive approach that extends to employers, K-12 educators, post secondary educators, and policy makers, among others. *Higher Education's Road to Relevance* is a much needed resource for college and university administrators, academic researchers, instructors, and other faculty and staff who support and interact with students.
