policy science Based on present trends our expensive dysfunctional system threatens patients families the government and taxpayers with future bankruptcy This book takes a 60 year view of our health care system from 1956 to 2016 from the perspective of a family physician who has lived through these years as a practitioner in two rural communities a professor and administrator of family medicine in medical schools a journal editor for 30 years and a researcher and writer on health care for more than four decades There has been a complete transformation of health care and medical practice over that time from physicians in solo or small group practice and community hospitals to an enormous largely corporatized industry that has left behind many of the traditions of personalized health care This is an objective non partisan look at the major trends changing U S health care over these years ranging from increasing technology and uncontrollable costs to depersonalization and changing ethics in medicine and health care This book points out some of the highs and lows of these changes over the years which may surprise some readers It also compares the three basic alternatives for health care reform currently being debated
