Roos, Daniel Schade, 2023-06-06 When EU member states signed the Treaty of Lisbon in 2007 they did not anticipate the manifold crises in store for them over the following years Instead of the intended consolidation of a Union which had just gone through its most profound modernisation and biggest round of enlargements the EU has since then had to weather a wide range of political economic social legal health and even military crises with major repercussions within and beyond its own territory Indeed this time of polycrisis has induced change on many levels Across the continent and its many fora of European supra trans and international collaboration established institutions rule systems and normative frameworks have been put into question and power balances have been shifting Against this background actors from social political economic and cultural life have sought new ways to overcome the manifold pressing problems of their time be it through intensified collaboration or attempts to increasingly resolve issues at the national level This volume offers a compilation of case studies on EU crisis responses covering the most impactful of the various crises the EU has had to face in recent years It provides theoretical and conceptual guidelines for the study of political actors responses to crisis at all levels of the EU multilevel governance system and beyond **West European Politics** Jack Hayward, 1995 **Political Representation in the**

European Union Sandra Kröger, 2014-04-03 In recent years the financial and economic crisis of 2008 9 has progressed into an equally important political and democratic crisis of the EU These troubled times have set the framework to re assess a number of important questions in regard to representative democracy in the EU such as the normative foundation of political representation the institutional relationship between representatives and represented the link between democracy and representation and new arenas and actors This book examines the diverse avenues through which different sorts of actors have expressed their voices during the Euro crisis and how their various interests are translated into the decision making process It offers a state of the art assessment of what political representation means in this context as well as a contribution to the representative turn in democratic theory The authors address three key themes The main actors and channels of political representation in the EU Interlocking levels of representation in the EU and the way in which national and supranational representation works How the European institutional system represents EU citizens through law and administration Focusing on the importance of representation in the legitimation of democracy this book will be of interest to students and scholars of European Union politics European studies democratic theory representation studies civil society and transnational democracy *New Challenges for the Eurozone Governance* José Caetano, Isabel Vieira, António
