Criteria For Scientific Development Public Policy And National Goals:

Science, Technology, and Public Policy: Books, monographs, documents, and articles in journals, 1968 through 1970 Lynton Keith Caldwell, William B. DeVille, Hedvah L. Shuchman, 1968 Science, Society, and the Search for Life in the Universe Bruce M. Jakosky, 2022-10-18 Are we alone in the universe As humans are we unique or are we part of a greater cosmic existence What is life s future on Earth and beyond How does life begin and develop These are age old questions that have inspired wonder and controversy ever since the first people looked up into the sky With today s technology however we are closer than ever to finding the answers Astrobiology is the relatively new but fast growing scientific discipline that involves trying to understand the origin evolution and distribution of life within the universe It is also one of the few scientific disciplines that attracts the public s intense curiosity and attention This interest stems largely from the deep personal meaning that the possible existence of extraterrestrial life has for so many Whether this meaning relates to addressing the Big Questions of our existence the possibility of encountering life on other planets or the potential impact on our understanding of religion there is no doubt that the public is firmly vested in finding answers In this broadly accessible introduction to the field Bruce Jakosky looks at the search for life in the universe not only from a scientific perspective but also from a distinctly social one In lucid and engaging prose he addresses topics including the contradiction between the public s fascination and the meager dialogue that exists between those within the scientific community and those outside of it and what has become some of the most impassioned political wrangling ever seen in government science funding Criteria for Scientific Development: Public Policy and National Goals Edward Shils, 1968 Collection of essays analysing the problems of scientific choice with a view to facilitating the development of a rational policy including government policy in respect of science and the financing of scientific research covers the criteria for choice the relationship between science technological change and economic growth technical cooperation and research in developing countries etc Diagrams and references

Science, Truth, and Democracy Philip Kitcher, 2001-11-08 Striving to boldly redirect the philosophy of science this book by renowned philosopher Philip Kitcher examines the heated debate surrounding the role of science in shaping our lives Kitcher explores the sharp divide between those who believe that the pursuit of scientific knowledge is always valuable and necessary the purists and those who believe that it invariably serves the interests of people

in positions of power In a daring turn he rejects both perspectives working out a more realistic image of the sciences one that allows for the possibility of scientific truth but nonetheless permits social consensus to determine which avenues to investigate He then proposes a democratic and deliberative framework for responsible scientists to follow Controversial powerful yet engaging this volume will appeal to a wide range of readers Kitcher's nuanced analysis and authorititative conclusion will interest countless scientists as well as all readers of science scholars and laypersons alike Policy Studies Organization Series Policy Studies Organization,1977 Technology, Planning, and Self-reliant Development Francisco R.
