Grains in China Zhang-Yue Zhou, Wei-Ming Tian, 2017-11-30 This book addresses the dynamics of China's grain production consumption and trade with a particular emphasis on China's demand for feedgrain vis a vis its demand for foodgrain and the likely implications of this on the international grain trade given that China is now a member of the WTO The book provides the reader with insight into the latest developments in China's foodgrain and feedgrain consumption and draws attention to the rising importance of feedgrain and the relative decline in importance of foodgrain in the overall Chinese grain economy It also offers deliberations on many important issues

concerning China's grains that are currently hotly debated. The book can be used as a valuable reference by government officials, grain traders, food market analysts, researchers, and university students who are interested in China's food issues in general and foodgrain and feedgrain issues in particular. *Critical Issues in China's Growth and Development* Eden S. H. Yu, Taylor & Francis Group, 2020-10-12. In approximately two decades, China has transformed from a stagnant socialist economy to one that is vibrant and largely market oriented. Given China's size, rapid economic growth, and her increasing importance as an economic and political power, the country's growth and development have aroused major interest among academics and policymakers worldwide. Written by a distinguished group of economists, this volume offers insight and in-depth analysis of a wide range of issues related to China's growth and development, from the role of higher education in the country's economic growth to socioeconomic issues such as stock market manipulation and rural-urban migration. The contributors are established scholars in the field, and their research methodologies are at the frontier of modern analytical economics, including economic dynamics and computable general equilibrium analysis. The volume will be of interest to students and researchers in the areas of Chinese economic studies, finance, and international economics, international business, and transitional economy. **Economic Growth, Income Distribution and Poverty Reduction in**

Contemporary China Shujie Yao, 2004-11-10. Yao reviews the economic development history of contemporary China from 1949 up to today, paying special attention to the interface among growth, inequality, and poverty reduction. **DFID and China** Great Britain. Parliament. House of Commons. International Development Committee, 2009. Incorporating HC 596 i, ii, and iii of session 2007-08, previously unpublished. *The Chinese Economy*, 2008. *China's Economy Into the New Century* John Wong, Ding Lu, 2002. In the last two decades of the 20th century, China stood out as the world's star performer in economic growth, thanks to the market-oriented reform that started in 1978. At the turn of the century, the Chinese economy faces a series of challenges to sustain its growth and stability. The two-decade-long rapid growth has effectively strengthened China's economic power and raised its people's standard of living. It has also transformed China from a centrally planned command economy into a socialist market economy which operates increasingly in line with capitalist norms. Major structural problems, however, remain and are growing acute. Weakness in the fiscal system breeds rent-seeking at the local level and causes tension in the state budget. The flawed financial institutions and the biased ownership structure continue to distort resource allocation and cause huge efficiency losses. Inter-provincial and inter-regional disparity is reaching a level that threatens national unity and social stability. As China joins the World Trade Organization and becomes more integrated into the world economy, it urgently needs to improve the domestic business environment and to beef up indigenous industries for foreign competition. This volume is a collection of papers written by scholars at the East Asian Institute to address those problems during the period 1999-2001. The authors, with their knowledge and experience in China studies, provide in-depth observations and professional analyses of some of the most important issues for the Chinese economy at the turn of the

century Some of the observations and analyses lead to enlightening policy recommendations The solid scholarship combined with the policy orientation of these papers will appeal greatly to researchers in academia governments and other institutions The policy oriented and fact based analyses will also be of interest to practitioners in business including business consultants

China's Surging Economy John Wong, Wei Liu, 2007 The Chinese economy today is at a critical crossroads Sustained rapid growth has given rise to structural strains as well as sectoral imbalances It has also generated socio economic problems such as rising income inequality rural discontent and environmental degradation All of these must be addressed before China can enter the next lap of high growth Containing 12 chapters this volume is a collaborative effort of leading economists from Beijing Singapore and elsewhere in the region in analyzing China's economic growth prospects and their concomitant problems and constraints **China's New Sources of Economic Growth: Vol. 2** Ligang Song, Ross Garnaut, Cai

Fang, Lauren Johnston, 2017-07-20 China's efforts in searching for new sources of growth are increasingly pressing given the persistence of the growth slowdown in recent years. This year's book elucidates key present macroeconomic challenges facing China's economy in 2017 and the impacts and readiness of human capital innovation and technological change in affecting the development of China's economy. The book explores the development of human capital as the foundations of China's push into more advanced growth frontiers. It also explores the progress of productivity improvement in becoming the primary mechanism by which China can sustain economic growth and explains the importance of China's human capital investments to success on this front. The book demonstrates that technical change is a major contributor to productivity growth and that invention and innovation are increasingly driving technical change but so far lumpily across regions, sectors, and invention motivations. Included are chapters providing an update on reform and macroeconomic development, educational inequality, the role of intangibles in determining China's economic growth, and China's progress in transitioning towards being an innovative country. The book also covers the regional dimension of innovation and technological progress by sector in agricultural productivity, renewable energy, and financial markets. Chapters on trade, investment, regional cooperation, and foreign aid explore further the mechanisms through which technological change and innovative activities are emerging locally and internationally.

China's 40 Years of Reform and Development: 1978-2018 Ross Garnaut, Ligang Song, Cai Fang, 2018-07-19 The year 2018 marks 40 years of reform and development in China. 1978-2018. This commemorative book assembles some of the world's most prominent scholars on the Chinese economy to reflect on what has been achieved as a result of the economic reform programs and to draw out the key lessons that have been learned by the model of growth and development in China over the preceding four decades. This book explores what has happened in the transformation of the Chinese economy in the past 40 years for China itself as well as for the rest of the world and discusses the implications of what will happen next in the context of China's new reform agenda. Focusing on the long-term development strategy amid various old and new challenges that face the economy, this book sets the scene for what the world can expect in China's fifth decade of reform and development. A key feature of this book is its comprehensive coverage of the key issues involved in China's economic reform and development. Included are discussions of China's 40 years of reform and development in a global perspective, the political economy of economic transformation, the progress of marketisation and changes in market-compatible institutions, the reform program for state-owned enterprises, the financial sector, and fiscal system reform and its foreign exchange system reform, the progress and challenges in economic rebalancing, and the continuing process of China's global integration. This book further documents and analyses the development experiences including China's large-scale migration and urbanisation, the demographic structural changes, the private sector, development, income distribution, land reform, and regional development, agricultural development, and energy and climate change policies.
