

Linear Programming/ Critical Path Analysis

Linear Programming is a mathematical technique for determining the best outcome (such as maximum profit or lowest cost) in a given model by altering several variables (the model is a mathematical representation of a real-life problem) under certain requirements (constraints). Linear Programming is a special case of Mathematical Programming, which is a more general term. Linear Programming is a technique for finding the optimal solution to a problem that can be represented by a linear equation. It is a technique for finding the optimal solution to a problem that can be represented by a linear equation. It is a technique for finding the optimal solution to a problem that can be represented by a linear equation.
