Critical Theory And Poststructuralism:

Critical Theory and Poststructuralism Mark Poster, 2019-05-15 In Critical Theory and Poststructuralism Mark Poster enacts a dialogue between the French poststructuralists especially Michel Foucault and the tradition of critical social theory as developed by the Frankfurt School and by other Continental theorists such as Jean Paul Sartre These confrontations between poststructuralists who represent postmodern thought and theorists committed the modern project of the Enlightenment is according to Poster of urgent importance because of the failure of critical theory to sustain a convincing critique of today's radically changed social formation

Schrift, 2014-09-11 Poststructuralism and Critical Theory's Second Generation analyses the major themes and developments in a period that brought continental philosophy to the forefront of scholarship in a variety of humanities and social science disciplines and that set the agenda for philosophical thought on the continent and elsewhere from the 1960s to the present Focusing on the years 1960-1984 the volume examines the major figures associated with poststructuralism and the second generation of critical theory the two dominant movements that emerged in the 1960s Althusser Foucault Deleuze Derrida Lyotard Irigaray and Habermas Influential thinkers such as Serres Bourdieu and Rorty who are not easily placed in standard histories of the period are also covered Beyond this thematic essays engage with issues as diverse as the Nietzschean legacy the linguistic turn in continental thinking the phenomenological inheritance of Gadamer and Ricoeur the influence of psychoanalysis the emergence of feminist thought and a philosophy of sexual difference the renewal of the critical theory tradition and the importation of continental philosophy into literary theory

Critique of Violence Beatrice Hanssen, 2014-02-25 Critique of Violence is a highly original and lucid investigation of the heated controversy between poststructuralism and critical theory Leading theorist Beatrice Hanssen uses Walter Benjamin's essay Critique of Violence as a guide to analyse the contentious debate shifting the emphasis from struggle to dialogue between the two parties Regarding the questions of critique and violence as the major meeting points between both traditions Hanssen positions herself between the two in an effort to investigate what critical theory and poststructuralism have to offer each other In the course of doing so she assembles imaginative new readings of Benjamin Arendt Fanon and Foucault and incisively explores the politics of recognition the violence of language and the future of feminist theory This groundbreaking book will be essential reading for all students of continental philosophy political theory social studies and comparative literature Also available in this series Essays on Otherness Hb 0 415 13107 3 50 00 Pb 0 415 13108 1 15 99 Hegel After Derrida Hb 0 415 17104 4 50 00 Pb 0 415 17105 9 15 99 The Hypocritical Imagination Hb 0 415 21361 4 47 50 Pb 0 415 21362 2 15 99 Philosophy and Tragedy Hb 0 415 19141 6 45 00 Pb 0 415 19142 4 14 99 Textures of Light Hb 0 415 14273 3 42 50 Pb 0 415 14274 1 13 99 Very Little Almost Nothing Pb 0 415 12821 8 47 50 Pb 0 415 12822 6 15 99

Critical Theory to Structuralism David Ingram, 2014-09-11

Philosophy in the middle of the 20th Century between 1920 and 1968 responded to the cataclysmic events of the time. Thinkers on the Right turned to authoritarian forms of nationalism in search of stable forms of collective identity will and purpose. Thinkers on the Left promoted egalitarian forms of humanism under the banner of international communism. Others saw these opposed tendencies as converging in the extinction of the individual and sought to retrieve the ideals of the Enlightenment in ways that critically acknowledged the contradictions of a liberal democracy racked by class, cultural, and racial conflict. Key figures and movements discussed in this volume include Schmitt, Adorno and the Frankfurt School, Arendt, Benjamin, Bataille, French Marxism, Black Existentialism, Saussure and Structuralism, Levi Strauss, Lacan, and Late Pragmatism. These individuals and schools of thought responded to this modernity crisis in different ways but largely focused on what they perceived to be liberal democracy's betrayal of its own rationalist ideals of freedom, equality, and fraternity.

From the New Criticism to Deconstruction Art Berman, 1988. *From the New Criticism to Deconstruction* traces the transitions in American critical theory and practice from the 1950s to the 1980s. It focuses on the influence of French structuralism and post-structuralism on American deconstruction within a wide-ranging context that includes literary criticism, philosophy, psychology, technology, and politics.

Logics of Disintegration Peter Dews, 2020-05-05. Over the last two decades, contemporary French philosophy has exercised a powerful influence on intellectual life across both Europe and America. Post-structuralist strategies and concepts have played an important role in many forms of social, cultural, and aesthetic analysis, particularly on the Left. Despite the widespread reception, however, there has still been comparatively little analysis of the basic philosophical assumptions of post-structuralism or of the compatibility of many of its central tenets with the progressive political orientations with which it is frequently associated. In this book, Peter Dews seeks to remedy this situation by setting post-structuralist thought in relation to another more explicitly critical tradition in the philosophical analysis of modernity: that of the Frankfurt School, from Adorno to Habermas. *Logics of Disintegration* will be of interest to readers across a wide range of disciplines, from literary criticism to social theory, which have felt the impact of post-structuralism, and to anyone who wishes to reach a balanced assessment of one of the most influential intellectual currents of our time.

Postcultural Theory E. Bannet, 1993-04-20. The world of literary theory and criticism is once again at a crossroads. While much of the academy has been absorbing and institutionalizing that unstable mixture of post-structuralism, deconstruction, political critique, and materialist historicism which is known as Cultural Theory, some people have been working up alternative theories. This book is about some of these less familiar Postcultural theories and about the ways in which they challenge current thinking and open other positive and constructive possibilities for thought and research in the nineties.

Post-Structuralism: A Note on the Philosophical School Pons Malleus, 2025-07-02 This book is an invitation into one of the most challenging provocative and enduring philosophical movements of the late 20th century post structuralism Emerging in the wake of structuralism s systematic approach to language culture and society post structuralism did not so much reject its predecessor as it questioned its foundational certainties It reoriented philosophical inquiry toward ambiguity contingency and the instability of meaning challenging our deepest assumptions about truth identity power and knowledge Post structuralism is not a unified doctrine or a clearly bounded school of thought Rather it is a constellation of thinkers Michel Foucault Jacques Derrida Gilles Deleuze Julia Kristeva Jean Baudrillard and others each charting a unique intellectual path What binds them however loosely is a shared skepticism toward totalizing narratives fixed categories and objective truths Where structuralism sought underlying systems whether linguistic anthropological or psychoanalytic post structuralism problematized those systems demonstrating how they are shaped by historical contingencies power dynamics and the play of language itself This book does not aim to simplify post structuralism into a set of clear rules or principles nor does it attempt to resolve its many internal tensions Instead it offers a guide through its core concepts difference deconstruction discourse power subjectivity and more while contextualizing them within the broader intellectual and historical landscape From Derrida s unsettling of the metaphysics of presence to Foucault s genealogies of knowledge and power from Deleuze s philosophy of becoming to Kristeva s theories of the abject post structuralism offers a relentless interrogation of the categories that structure thought and society Crucially this book seeks to clarify not codify The writing of many post structuralists is notoriously difficult sometimes maddeningly so This complexity is not a mere stylistic flourish it often reflects the very nature of the questions being asked questions that resist closure and demand a new kind of philosophical literacy Yet with patient reading and careful attention the rewards of engaging with post structuralist thought are profound It offers tools for examining the assumptions beneath our language institutions and identities revealing how what appears natural or self evident is often historically constructed and ideologically motivated This

book is for students encountering post structuralism for the first time for scholars seeking a synthetic overview and for readers from other disciplines literature sociology political theory cultural studies who find themselves drawn to its critical promise It is written with the conviction that philosophy is not an abstract self contained enterprise but a living practice that helps us understand and perhaps reshape the world we inhabit In an age increasingly dominated by rigid ideologies identity essentialisms and algorithmic certainties the post structuralist impulse to question foundations to embrace complexity and to remain open to the other feels more urgent than ever Whether one ultimately agrees with its premises or not engaging seriously with post structuralism can sharpen critical awareness and deepen our understanding of the conditions that shape contemporary thought and life

Critical Theory, Poststructuralism and 'Nietzsche's Paradox' Nektarios Kastrinakis,2025-07-18 Critical Theory Poststructuralism and Nietzsche s Paradox addresses a fundamental question in the exchange between Critical Theory and poststructuralism is poststructuralism justified in its critique of dialectical thinking and in the conclusion of this critique that we need to leave dialectics behind us to properly understand the social world When Deleuze s book *Nietzsche and Philosophy* was first published back in 1962 it caused a sensation in France and its Nietzschean critique of Hegelian dialectics played a pivotal role in the emergence of the current of thought we call poststructuralism However to what extent is this critique valid and justified This question has never been adequately investigated With this book Nektarios Kastrinakis attempts such an investigation through the exploration of the influence of
