Critical Writing Workshop Designing Writing Assignments To Foster Critical Thinking:

The Critical Writing Workshop Toni-Lee Capossela,1993 **Critical Thinking and Language** Tim John

Moore,2011-10-13 This book clarifies the idea of critical thinking by investigating the critical practices of academics across a range of disciplines Drawing on key theorists Wittgenstein Geertz Williams Halliday and using a textographic approach the book explores how the concept of critical thinking is understood by academics and also how it is constructed discursively in the texts and practices they employ in their teaching Critical thinking is one of the most widely discussed concepts in debates on university learning For many the idea of teaching students to be critical thinkers characterizes more than anything else the overriding purpose of higher education But whilst there is general agreement about its importance as an educational ideal there is surprisingly little agreement about what the concept means exactly Also at issue is how and what students need to be taught in order to be properly critical in their field This searching monograph seeks answers to these important questions

A New Writing Classroom Patrick Sullivan,2014-07-15 In A New Writing Classroom Patrick Sullivan provides a new generation of teachers a means and a rationale to reconceive their approach to teaching writing calling into question the discipline s dependence on argument Including secondary writing teachers within his purview Sullivan advocates a more diverse exploratory and flexible approach to writing activities in grades six through thirteen A New Writing Classroom encourages teachers to pay more attention to research in learning theory transfer of learning international models for nurturing excellence in the classroom and recent work in listening to teach students the sort of dialogic stance that leads to higher order thinking and more sophisticated communication The conventional argumentative essay is often a simplistic form of argument widely believed to be the most appropriate type of writing in English classes but other kinds of writing may be more valuable to students and offer more important kinds of cognitive challenges Focusing on listening and dispositions or habits of mind as central elements of this new composition pedagogy A New Writing Classroom draws not just on composition studies but also on cognitive psychology philosophy learning theory literature and history making an exciting and significant contribution to the field
