Critical Elections British Parties And Voters In Long Term Perspective:

Critical Elections Geoffrey Evans,Pippa Norris,1999-04-28 Did Labour s landslide victory in 1997 mark a critical watershed in British party politics Did the radical break with 18 years of Conservative rule reflect a fundamental change in the social and ideological basis of British voting behaviour Critical Elections brings together leading scholars of parties elections and voting behaviour to provide the first systematic overview of long term change in British electoral politics

Paul Webb,2000-09-22 Providing a complete up to date overview of the changing nature of contemporary party politics in Britain this book draws on models of comparative politics and the latest empirical analysis to explain the capacity of British parties to adapt to a changing political environment A number of broad themes include the nature and extent of party competition the internal life and organizational development of parties the variety of evolving party systems in the United Kingdom and the links between parties and the wider political system The current weaknesses of party performance are addressed and the scope of reform explained and examined Contrary to claims of decline however the book demonstrates that party politic **British Social Attitudes** Roger Jowell,John Curtice,Alison Park,Katarina Thomson,Lindsey

Jarvis,Catherine Bromley,Nina Stratford,2000-11-23 I ve always enjoyed reading the British Social Attitudes survey which shows what the British people really think as opposed to what journalists and politicians like to pretend they think John Pilger Britain is a well documented nation We know a lot about the characteristics of our society who we are and what we do We know much less about what we think and feel about our world and ourselves The indispensable annual British Social Attitudes survey fills this gap It compiles describes and comments on a range of current social attitudes The information is derived from interviews carried out by the National Centre for Social Research s own interviewers among a nationwide sample of around 3 500 people each year The series seeks to chart changes in British social values over a period of time in relation to other changes in society and is core funded by the Gatsby Charitable Foundation A full report is published each year The 17th Report summarizes and interprets data from the most recent survey as well as making comparisons with findings from previous years The data are publicly available through the ESRC Data Archive at the University of Essex

British Social Attitudes Alison Park,John Curtice,Katarina Thomson,Lindsey Jarvis,Catherine Bromley,Nina

Stratford, 2001-11-28 The indispensable annual British Social Attitudes survey compiles, describes and comments on a range of current social attitudes. The series charts changes in British social values with annual surveys carried out from a nationwide sample of around 3 500 people by the National Centre for Social Research's team of interviewers. The 18th Report summarizes and interprets data from the most recent survey and makes comparisons with findings from previous years. The Rolls Royce of opinion surveys. *The Times*

The 2001 General Election Lynn G. Bennie, 2002 Containing contributions from leading names in British politics, this review continues to publish front rank research on parties, elections and voting behaviour in Britain. *Electoral Behavior: Forecasting and electoral context* Kai Arzheimer, Jocelyn Evans, 2008 *The Dynamics of Referendum Campaigns* Claes H. de Vreese, 2007-10-24 Direct democracy is popular. Referenda are an increasingly important means of enacting or preventing legislation in countries around the world. This book focuses on the key actors in a referendum: the political elites, parties, the media and citizens, and is centered around themes such as campaign style, campaign effects, electoral mobilization and turnout, as well as vote choice. The contributors specifically address the role of referendum campaigns and their impact and show why referendum campaigns may matter more than any other political election campaigns.

Citizenship in Contemporary Europe Michael Lister, Emily Pia, 2008 Uniting a broad theoretical approach to citizenship with a broad empirical scope, this text analyses a range of theoretical perspectives on citizenship in order to analyse developments in Europe. *European Politics Today* Gabriel Abraham Almond, Russell J. Dalton, G. Bingham Powell, 2002 This is the first truly pan-European survey of contemporary European politics that includes nations from both Western and Eastern Europe, as well as a separate chapter on the European Union. Written by foremost scholars in the field, the book examines questions about the foundations and processes of democratic government and then compares the experiences of seven nations in Western and Eastern Europe. This framework provides a basis for comparing political values, institutions and processes across Europe.

Europe in Question Sara Binzer Hobolt, 2009 Direct democracy has become an increasingly common feature of European politics with important implications for policy making in the European Union. The no votes in referendums in France and the Netherlands put an end to the Constitutional Treaty and the Irish electorate has caused another political crisis in Europe by rejecting the Lisbon Treaty. *Europe in Question* explains how voters decide in referendums on European integration. It presents a comprehensive theoretical framework for understanding voting behaviour in referendums and a thorough comparative analysis of EU referendums from 1972 to 2008. To examine why people vote the way they do, the role of political elites and the impact of the campaign dynamics, this book relies on a variety of sources including survey data, content analysis of media coverage, experimental studies and elite interviews. The book illustrates the importance of campaign dynamics and elite endorsements in shaping public opinion, electoral mobilization and vote choices. Referendums are often criticized for presenting citizens with choices that are too complex and thereby generating outcomes that have little or no connection with the ballot proposal. Importantly, this book

shows that voters are smarter than they are often given credit for They may not be fully informed about European politics but they do consider the issues at stake before they go to the ballot box and they make use of the information provided by parties and the campaign environment Direct democracy may not always produce the outcomes that are desired by politicians But voters are far more competent than commonly perceived

Gender in Modern Britain Nickie Charles, 2002 Nickie Charles discusses theoretical developments in the sociological study of gender providing an overview of how conceptual shifts have affected not only what is studied which is itself changing but also how it is studied and the questions that are asked The empirical areas that provide the focus of the book are paid employment domestic labour parenting education the crisis of masculinity sexuality and politics Although the book is centrally concerned with gender attention is paid to other bases of inequality and social identities such as class ethnicity and sexuality Throughout the author engages with contemporary debates about the significance of changes in gender relations showing that while there has been very real change in some areas of social life in others there has been remarkable continuity Finally gender relations in Britain are situated in international context and linked to global social and economic processes and divisions of labour This important new study of gender in modern Britain provides a succinct and clearly written textbook for students on gender studies women's studies and sociology of gender courses

Turnout in Germany Markus Steinbrecher, Sandra Huber, Hans Rattinger, 2007 Voter turnout in Germany has been declining since the end of the 1980s European and Landtag representative assembly elections are particularly affected by this development The all time low was a turnout of 43 percent in the European Parliament election in 2004 The causes for this dramatic decline are a regular topic in public debates This book analyzes the participation of Germans in European Bundestag Parliament and Landtag elections since 1979 With its broad research design the book integrates the most important approaches of empirical electoral research In the first part of the book turnout is described within its geographic and social context by means of data from official statistics However individual attitudes and motives of the voters are even more important for the interpretation of declining turnout and are thus examined in the second part of the book The weakening of social norms and political dissatisfaction has dramatic consequences for turnout and cannot be

statistics and analyses this publication contains a thematic focus on voter registration Voter registration is the process of exercising the franchise and as such is a key condition of electoral participation History shows us that the removal of barriers to registration is essential to the full exercise of a citizen's political rights Country case studies as well as an analysis of the voter registration methods used today in the world are presented together with graphs and global information on voter registration

Nye, 2000 Far from being another short lived buzzword globalization refers to real changes These changes have profound impacts on culture economics security the environment and hence on the fundamental challenges of governance This book asks three fundamental questions How are patterns of globalization currently evolving How do these patterns affect governance And how might globalism itself be governed The first section maps the trajectory of globalization in several dimensions economic cultural environmental and political For example Graham Allison speculates about the impact on national and international security and William C Clark develops and evaluates the concepts of environmental globalization The second section examines the impact of globalization on governance within individual nations including China struggling countries in the developing world and the industrialized democracies and includes Elaine Kamarck's assessment of global trends in public sector reform The third section discusses efforts to improvise new approaches to governance including the role of non governmental institutions the global dimensions of information policy and Dani Rodrik's speculation on global economic governance
