**Higher Education: A Critical Business** Ronald Barnett, 1997-06-16 Higher Education A Critical Business is a bold statement about higher education in the modern age It continues Ronald Barnett's thinking of his earlier books but offers a completely new set of ideas in a challenging but engaging argument A defining concept of the Western university is that of critical thinking but that idea is completely inadequate for the changing and unknowable world facing graduates Instead we have to displace the idea of critical thinking with the much broader idea of critical being In this idea students reflect critically on knowledge but they also develop their powers of critical self reflection and critical action This critique is transformatory An education for critical being calls for a new approach to the process of higher education It also has

implications for the organization and management of universities and for the relationship of universities to the wider worlds of work professionalism and intellectual life Barnett reviews what the academy customarily means when it talks about critical thought explains why that talk is so often shallow and pessimistic and holds up for contemplation a positive conception of a very wide self formed through education He breathes completely new life into the dead notion of academic as intellectual Professor Sheldon Rothblatt University of California Berkeley and Royal Institute of Technology Sweden Anyone interested in understanding how we might develop universities and higher education for the modern world should read this important book **The Dublin University Review ...** ,1885 **The Institution of Theory** Murray Krieger,1994-06 Originally published in 1994 In *The Institution of Theory* Murray Krieger examines at once sympathetically and critically the process by which theory has become institutionalized in the American academy and the consequences of theory as an academic institution He traces the transformation of literary theory into critical theory and relates it to changes in the place of literature within questions about discourse at large And he faces the costs as well as the gains of the recent denial of privilege to the literary To support his view of the issues at stake in current theoretical debates Krieger surveys both the history of American criticism and the general history of literary theory in the West He sees divisions in each of them that foreshadow the current debates in the first a conflict between the social and the aesthetic functions of literature and in the second a conflict between the treatment of literature as a reflection of a culture s ideology and the treatment of literature as a subversion of that ideology To what extent he asks are our debates new and to what extent are they merely refashioned versions of those we have always had **University of California Chronicle** University of California, Berkeley,1922
