TV Critics and Popular Culture Paul Rixon, 2011-11-30 Ever since the first scheduled television broadcasts began in the 1930s newspapers and magazines took quickly to reviewing this revolutionary new medium The task of television criticism in the public domain initially fell to radio critics and journalists but the 1950s saw the rise of the dedicated TV critic These critics including Peter Black Philip Porsor and Clive James played an important part in shaping the public discourse about television This new book explores the evolution of television criticism in Britain exploring different types of TV critics and reviewers the form of their work and evaluates their importance in our understanding of the way television has become such an integral part of modern culture It also asks whether with the birth of new technologies is the TV critic a dying breed This is an important contribution to the fields of Journalism and Television Studies Cultural Studies and contemporary History

The Critic's Credentials Stanley Edgar Hyman, 1978 Professing Criticism John Guillory, 2022-12-30 A sociological history of literary study both as a discipline and as a profession As the humanities in higher education struggle with a labor crisis and with declining enrollments the travails of literary study are especially profound No scholar has analyzed the discipline's contradictions as authoritatively as John Guillory In this much anticipated new book Guillory shows how the study of literature has been organized both historically and in the modern era both before and after its professionalization The traces of this volatile history he reveals have solidified into permanent features of the university Literary study continues to be troubled by the relation between discipline and profession both in its ambivalence about the literary object and in its anxious embrace of a professionalism that betrays the discipline's relation to its amateur precursor criticism In a series of timely essays *Professing Criticism* offers an incisive explanation for the perennial churn in literary study the constant revolutionizing of its methods and objects and the permanent crisis of its professional identification It closes with a robust outline of five key rationales for literary study offering a credible account of the aims of the discipline and a reminder to the professoriate of what they already do and often do well

Literary Milieux David Womersley, Richard Anthony McCabe, 2008 The essays range from Shakespeare and early modern literature to Wordsworth They evince scrupulous care over the handling of evidence an interdisciplinary impulse yoked always to a prizing of the literary particularly the poetic a willingness to embrace an ambitious argument where it can be supported a humaneness of temper particularly in polemic Latent within them all is a wrestling with the central problem of text and context
