and Research Methods for Educators Makewa, Lazarus Ndiku, Ngussa, Baraka Manjale, Kuboja, Joshua Michael, 2018-09-28. Technology can be a powerful tool for transforming learning. It can help affirm and advance relationships between educators and students, reinvent approaches to learning, and collaboration, shrink long-standing equity and accessibility gaps, and adapt learning experiences to meet the needs of all learners. *Technology-Supported Teaching and Research Methods for Educators* provides innovative insights into the utilization and maintenance of technology-supported teaching and research methods for educators. The content within this publication represents the work of e-learning, digital technologies, and current issues and trends in the field of teaching and learning in the context of contemporary technologies. It is a vital reference source for school educators, professionals, school administrators, academicians, researchers, and graduate-level students seeking coverage on topics centered on the integration of effective technologies that will support educators and students. Research Anthology on Developing Effective Online Learning Courses Management Association, Information Resources, 2020-12-18. In the current educational environment, there has been a shift towards online learning as a replacement for the traditional in-person classroom experience. With this new environment comes new technologies, benefits, and challenges for providing courses to students through an entirely digital environment. With this shift comes the necessary research on how to utilize these online courses and how to develop effective online educational materials that fit student needs and encourage student learning motivation and success. The optimization of these online tools requires a deeper look into curriculum, instructional design, teaching techniques, and new models for student assessment and evaluation. Information on how to create valuable online course content, engaging lesson plans for the digital space, and meaningful student activities online are only a few of many current topics of interest for promoting student achievement through online learning. The *Research Anthology on Developing Effective Online Learning Courses* provides multiple perspectives on how to develop engaging and effective online learning courses in the wake of the rapid digitalization of education. This book includes topics focused on online learners, online course content, effective online instruction strategies, and instructional design for the online environment. This reference work is ideal for curriculum developers, instructional designers, IT consultants, deans, chairs, teachers, administrators, academicians, researchers, and students interested in the latest research on how to create online learning courses that promote student success.
