, *System Innovation for an Artificial Intelligence Era* Artde Donald Kin-Tak Lam, Stephen D. Prior, Siu-Tsen Shen, Sheng-Joue Young, Liang-Wen Ji, 2024-11-05 *System Innovation for an Artificial Intelligence Era Applied System Innovation X* contains the papers presented at the IEEE 10th International Conference on Applied System Innovation ICASI 2024 Kyoto Japan 17-21 April 2024. The book aims to provide an integrated communication platform for researchers from a wide range of topics including information technology, communication science, applied mathematics, computer science, advanced material science, and engineering. *System Innovation for an Artificial Intelligence Era Applied System Innovation X* enhances interdisciplinary collaborations between science and engineering and is aimed at academics and technologists interested in the above mentioned areas. **Mastering AI** Jeremy Kahn, 2025-07-08 A Fortune magazine journalist draws on his expertise and extensive contacts among the companies and scientists at the forefront of artificial intelligence to offer dramatic predictions of AI's impact over the next decade from reshaping our economy and the way we work, learn, and create to unknitting our social fabric, jeopardizing our democracy, and fundamentally altering the way we think. Within the next five years, Jeremy Kahn predicts AI will disrupt almost every industry and enterprise with vastly increased efficiency and productivity. It will restructure the workforce, making AI copilots a must for every knowledge worker. It will revamp education, meaning children around the world can have personal, portable tutors. It will revolutionize health care, making individualized, targeted pharmaceuticals more affordable. It will compel us to reimagine how we make art, compose music, and write and publish books. The potential of generative AI to extend our skills, talents, and creativity as humans is undeniably exciting and promising. But while this new technology has a bright future, it also casts a dark and fearful shadow. AI will provoke pervasive, disruptive, potentially devastating knock-on effects. Leveraging his unrivaled access to the leaders, scientists, futurists, and others who are making AI a reality, Kahn will argue that if not carefully designed and vigilantly regulated, AI will deepen income inequality, depress wages, while imposing winner-take-all markets across much of the economy. AI risks undermining democracy as truth is overtaken by misinformation, racial bias, and harmful stereotypes. Continuing a process begun by the internet, AI will rewire our brains, likely inhibiting our ability to think critically, to remember, and even to get along with one another unless we all take decisive action to prevent this from happening. Much as Michael Lewis's classic *The New New Thing* offered a prescient, insightful, and eminently readable account of life inside the dot-com bubble, *Mastering AI* delivers much-needed guidance for anyone eager to understand the AI boom and what comes next. *ARTIFICIAL INTELLIGENCE AND CONTEMPORARY MEDIA* Dr. Moon Jana, Dr. Shourini Banerjee, 2025-06-13 Artificial intelligence plays a pivotal role in transitioning from generic, uniform content to personalised experiences tailored for an individualistic approach. Utilising sophisticated algorithms, AI platforms analyse user sentiments, behaviours, and

engagement patterns to curate tailored content news feed videos articles and advertisements This book aims at understanding different viewpoints from authors on Artificial Intelligence technology and the contemporary media scenario
