Intelligent Systems Design Larry Bielawski, Robert Lewand, 1991-01-16. In this book we focus on intelligent systems that are based on the integration of expert systems, hypermedia, and database technologies. Together they offer a rich environment for creating computer applications that can increase productivity enormously and act as intelligent assistants. Though hypermedia and expert systems technologies date back thirty or more years as independent technologies, it has only been in the last three years that their paths have fully converged, offering system developers a flexible environment that takes advantage of existing information and data. The combination of hypermedia and expert systems is quite attractive as it leads to overall increases in productivity. **Conference Record, Industry Applications Society, IEEE-IAS Annual Meeting (1981)** IEEE Industry Applications Society, 1987. *Datamation*, 1987.
