follow a rags to riches storyline for example But how can all the players end up in the top 10% Simple the upwardly mobile human players need only be a subset of the world s population An underclass of computer controlled bot citizens meanwhile stays poor forever Mr Castronova explains all this with clarity wit and a merciful lack of academic jargon The Economist Synthetic Worlds is a surprisingly profound book about the social political and economic issues arising from the emergence of vast multiplayer games on the Internet What Castronova has realized is that these games where players contribute considerable labor in exchange for things they value are not merely like real economies they are real economies displaying inflation fraud Chinese sweatshops and some surprising in game innovations Tim Harford Chronicle of Higher Education
