Foucault, Crime and Power Christian Borch, 2014-11-13 This book presents a Foucauldian problematisation analysis of crime with a particular focus on the twentieth century It considers how crime has been conceived as problem and by scrutinising the responses that have been adapted to deal with crime demonstrates how a range of power modalities have evolved throughout the twentieth century Christian Borch shows how the tendency of criminologists to focus on either disciplinary power or governmentality has neglected the broader complex of Foucault s concerns ignoring its historical underpinnings whilst for the most part limiting studies to only very recent developments without giving sufficient attention to their historical backdrop The book uses developments in Denmark developments that can be readily identified in most other western countries as a paradigmatic case for understanding how crime has been problematised in the West Thus Foucault *Crime and Power* Problematisations of Crime in the Twentieth Century demonstrates that a Foucauldian approach to crime holds greater analytical potentials for criminological research than have so far been recognized THE POWER OF CHOICE : WRITE YOUR OWN TICKET TO SUCCESS ISKANDAR ISHAM BIN ISMAIL, 2017-10-17 This book is dedicated for all that wanted to make a change in their lives Self Empowerment using the Power of Choice Did you realise that your life is dictate

by making choices everyday How those around you affected your decision making Realising that freedom is just an illusion where it will affect our decision making Making more money or power doesn't mean we are REALLY happy Discover and understand how Power of Choice works Every time we move forward we make choices every time we went backwards we make choices yet the most important thing in everything is that your choice is your own no one else because it is you your life

Cohen, 2022-03-10 Demonstrating the crucial role that private international law and legality has played and continues to play in shaping globalization this book argues that the rules institutions and actors that make up the practice of private international law have been critical in translating political and economic power into legal regimes that have facilitated the processes of globalization These processes depend on two fundamental types of socio political action the legal structuring of emerging transnational spaces and flows of goods capital and finance and the legal political reconfiguration of state power and priorities to facilitate the growth of these spaces and their penetration into national political economic and social spaces While a variety of processes were involved in these forms of action the material practices of private international law played a central role in this project of political economic reconstruction Offering a theory of private international legality as a practice that intersects with and provides a vehicle for the mobilization of political and economic power this book examines the construction and enrolment of private law expertise and the structural condition of pluralism in the global political economy to argue that private international law has helped construct a global political economy responsive to the priorities of powerful actors and resistant to the demands and interests of the rest of the world's populations It will be of interest to academics and students exploring the relationship between law international political economy and the nature of state power *Michel Foucault and Power Today* David A.
