*Impacts of the Knowledge Society on Economic and Social Growth in Africa* Amoah, Lloyd G. Adu, 2014-03-31 In a world that is essentially digitizing some have argued that the idea of the knowledge society holds the greatest promise for Africa s rapid socio economic transformation Impacts of the Knowledge

Society on Economic and Social Growth in Africa aims to catalyze thinking and provide relevant information on the complex ways in which the information age is shaping Africa and the implications that this will have for the continent and the world. This premier reference volume will provide policy analysts, policymakers, academics, and researchers with fresh insights into the key empirical and theoretical matters framing Africa's ongoing digitization.

**Working the System in Sub-Saharan Africa** Corrado Tornimbeni, 2014-07-08. What is the extent to which democracy, good governance, liberal citizenship, and development are negotiated and shaped in sub-Saharan African countries in the context of the globalised world? Is this a characteristic of the current historical era alone? Do global ideas about politics and development in sub-Saharan Africa take on new meanings in light of local circumstances and visions? The works presented in this volume offer context-based analyses that contribute to showing how local practices of citizenship, democracy, and development in sub-Saharan Africa have been working the system of global ideas on good governance, policies, and development, and how this system also builds on the way in which historically local narratives are presented to actors in the international context. Democracy and good governance are considered the universally shared paradigms shaping policy prescriptions and development practices in the context of the current globalised world. Space for negotiating these recipes at the local level is considered to be particularly narrow, especially in sub-Saharan Africa, but it is also believed that international paradigms are reshaped into peculiar forms when implemented under local circumstances. From the early 1990s onwards, these processes have drawn the attention of academics as well as the wider public, but rarely is their historical dimension taken into account. The Africa world nexus in politics and development is not a characteristic of the current global world alone, as is too often assumed. Adding an historical perspective to the analysis of the multilevel interconnections between local power relations, the politics of colonial and independent rule, and the global discourses of democracy, citizenship, and development will contribute to a sound theoretical stance in addressing what is considered the main feature of current times: globalisation and its flows. That is what this volume tries to accomplish. It does so by developing three themes in particular: the trajectory of the colonial and independent nation-state and its impact on the local and national politics of citizenship, identity, and development; the way global ideas on development are converted into practice or how they are interpreted and negotiated at the local level; and issues of belonging and identity in relation to concepts and practices of political control. Case studies will include Portuguese colonialism, Mozambique, Tanzania, Zimbabwe, Senegal, Casamance, and Uganda.

**The Politics of Neoliberal Democracy in Africa** Usman A. Tar, 2009. Since the late 1980s, the changing dynamic of global development has driven the tide of democratic expansion in the developing world. In Africa, western donors have sought to impose neo-liberal visions of socio-economic and political institution building, spreading political reforms, and economic liberalisation with far-reaching consequences. Associated with external interventions but also sometimes conflicting with them are internal protests against authoritarianism, which have problematically reinforced and/or undermined the donor agenda for democratic reform. Here, Usman Tar questions the

assumption that Africa was lacking the essential components for a spontaneous transition to democracy He explores the dynamic but contradictory links between external and internal dimensions of neo liberal democratic expansion in Africa focusing on Nigeria Tar dissects the struggles for democracy and for democratic policy and practice in a country with rich economic potential but a troubled political dispensation **The Transition to Democratic Governance in Africa** John Mukum Mbaku, Julius O.
