

What is the relationship between discourse analysis and language teaching?

Classroom discourse seems to be the best way of systematizing the linguistic code that learners are to acquire. The greatest opportunity to store, develop and use the knowledge about the target language is arisen by exposure to authentic discourse in the target language provided by the teacher.

APPLICATION OF DISCOURSE ANALYSIS TO TEACHING GRAMMAR

Interested in its significance for producing comprehensible communicative products, realization of grammar items in different languages, their frequency of occurrence in speech and writing which is to enable teaching more natural usage of the target language, as well as learners' native tongue.. it is advisable to provide learners with contexts which would exemplify how native users of language take advantage of anaphoric references, ellipses, articles and other grammar related elements of language which, if not crucial, are at least particularly useful for proficient communication

APPLICATION OF DISCOURSE ANALYSIS TO TEACHING VOCABULARY

Discourse analysts maintain that knowledge of vocabulary-connected discourse devices supports language learning in diverse manners. Firstly, it ought to bring students to organize new items of vocabulary into groups with common context of use to make them realize how the meaning of a certain word might change with circumstances of its use or co-text. Moreover, it should also improve learners' abilities to choose the appropriate synonym, collocation or hyponym

APPLICATION OF DISCOURSE ANALYSIS IN SECOND LANGUAGE WRITING

The writing classroom in English as a second language (ESL) can be organized so that students themselves learn to analyze the written discourse of the society around them and appropriate the results of their analysis for their own writing purposes. In so doing, they can personalize their learning, choosing discourse materials suitable for their own proficiency level and areas of special interest. By introducing specific discourse analysis techniques and tasks, instructors can foster greater independence in their students as they develop the ability to take control of their own language development. A discourse analysis approach also leads to greater writing versatility, as student writers are exposed in a systematic way to a variety of written genres, or types of written discourse. Each genre presents a different set of rhetorical choices that students can study and adapt to their own writing.

APPLICATION OF DISCOURSE ANALYSIS TO TEACHING TEXT INTERPRETATION

Interpretation of a written text in discourse studies might be defined as the act of grasping the meaning that the communicative product is to convey. It is important to emphasize that clear understanding of writing is reliant on not only what the author put in it, but also on what a reader brings to this process.
