Discourse Studies Teun Adrianus van Dijk, 1997 **Discourse Studies: a Multidisciplinary Introduction Vol 1** a teun, 1997 *Discourse as social interaction* Teun A. van Dijk, 1997? **Discourse Studies** Dijk, Teun Adrianus van Dijk, *Discourse as Structure and Process* Teun A. van Dijk, 1997 What are the structures of discourse and what are the functions of these structures in the communicative context This volume explains how and why discourse is organized at various levels The multidisciplinary contributions illustrate that discourse analysis goes far beyond the linguistic answer of designing grammars and goes hand in hand with the study of their uses and functions in the social context Comprehensive and accessible the volume covers a huge variety of discourse genres including written and spoken and storytelling and argumentation The chapters also illustrate the necessity to examine the mental processes of the language users How do people go about producing understanding and remembering text or talk The book stresses that both discourse and its mental processing have a social basis and can only be fully understood in relation to social interaction **Methods in Cognitive Linguistics** Monica Gonzalez-Marquez, 2007 *Methods in Cognitive Linguistics* is an introduction to empirical methodology for language researchers Intended as a handbook to exploring the empirical dimension of the theoretical questions raised by Cognitive Linguistics the volume presents guidelines for employing methods from a variety of intersecting disciplines laying out different ways of gathering empirical evidence The book is divided into five sections *Methods and Motivations* provides the reader with the preliminary background in scientific methodology and statistics The sections on *Corpus and Discourse Analysis* and *Sign Language and Gesture* describe different ways of investigating usage data *Behavioral Research* describes methods for exploring mental representation simulation semantics child language development and the relationships between space and language and eye movements and cognition Lastly *Neural Approaches* introduces the reader to ERP research and to the computational modeling of language **Handbook of Interpersonal Communication** Mark L. Knapp, John A. Daly, 2002-10 The Third Edition of the *Handbook of Interpersonal Communication* includes eight new chapters and eleven revised from the second edition Following an introductory chapter the volume is organized into four parts covering perspectives on inquiry in interpersonal communication fundamental units of interpersonal communication processes and functions and interpersonal contexts Features include Each chapter reviews and updates research in its respective area Part II examines methodological issues in the field Includes articles by top scholars in the field of Interpersonal Communication Migration and the Construction of National Identity in Spain Désirée Kleiner-Liebau, 2009 Public debate about immigrant integration has often led to a heightened awareness or even a collective redefinition of identity Such processes are studied through the unique example of Spain **Framing the Threat** Imke Köhler, 2019-03-04 There is great power in the use of words words create most of what we consider to be real and true Framing our words and narratives is thus a tool of power but a power that also comes with limitations This intriguing issue is the topic of *Framing the Threat* an investigation of the relationship between language and security and of how discourse creates the scope of possibility for

political action In particular the book scrutinizes and compares the security narratives of the former US presidents George W Bush and Barack Obama It shows how their framings of identity i e of the American self and the enemy other facilitated a certain construction of threat that shaped the presidents detention and interrogation policies By defining what was necessary in the name of national security Bush s narrative justified the operation of the detention center at Guantanamo Bay and rendered the mistreatment of detainees possible a situation that would have otherwise been illegal Bush s framings therefore enabled legal limits to be pushed and made the violation of rules appear legitimate Obama in contrast constructed a threat scenario that required an end to rule violations and the closure of Guantanamo for security reasons According to this narrative a return to the rule of law was imperative if the American people were to be kept safe However Obama s framing was continually challenged and it was never able to dominate public discourse Consequently Framing the Threat argues Obama was unable to implement the policy changes he had announced

Discourse Studies: Discourse as structure and process Teun A. van Dijk, 1997 What are the structures of discourse and what are the functions of these structures in the communicative context This volume explains how and why discourse is organized at various levels The multidisciplinary contributions illustrate that discourse analysis goes far beyond the linguistic answer of designing grammars and goes hand in hand with the study of their uses and functions in the social context Comprehensive and accessible the volume covers a huge variety of discourse genres including written and spoken and storytelling and argumentation The chapters also illustrate the necessity to examine the mental processes of the language users How do people go about producing understanding and remembering text or talk

Conventional and Original Metaphors in French Autobiography Madalina Akli, 2009 This book studies three autobiographies each of which is at least partially devoid of chronological structure Sartre s *The Words* Perec s *W or The Memory of Childhood* and Sarraute s *Childhood* Calendar based order traditionally associated with autobiography fails to provide the coherence the readers expect Hence readers must create a sense of coherence at another level by using their conceptual resources *Conventional and Original Metaphors in French Autobiography* reveals that in these literary texts coherence is maintained based on the exploitation of conventional metaphors taken from everyday language which the autobiographers transform in a creative yet familiar manner These common metaphors offer guidance to readers and establish coherence between the shared life experiences of reader and autobiographer In the course of reading the autobiographers and the readers life experiences overlap through familiar metaphors which serve as organizational devices in writing and as guiding principles in reading
