The Great Dinosaur Discoveries Darren Naish, 2009. This elegantly illustrated volume is a journey through more than two centuries of remarkable discovery. Books on dinosaurs are usually arranged by classification or epoch, but this unique work tells the story chronologically in order of the key finds that shaped our understanding and brought these creatures to life for the public. From the fragmentary remains of giant extinct animals found in the early 1800s to the dinosaur wars in the American West to the amazing near-complete skeletons found around the world today, Darren Naish tells how these discoveries have led not only to the recognition of new species and whole new groups but also to new theories of evolutionary history. Along the way we encounter dinosaurs both familiar and obscure, including *Tyrannosaurus rex*, the giant sauropods, and most recently the feathered dinosaurs of China. As he describes these significant finds, Naish explains in clear, accessible language how our ideas about dinosaur appearance, biology, and behavior have developed and changed over time, and what the state of knowledge is today. Discusses each major dinosaur group. Illuminates the human side of fossil discoveries by describing explorers, scientists, and artists. Beautifully designed pages feature extensive captions, engaging text, and sidebars throughout on select topics of interest. Almost 200 illustrations include historical and contemporary photographs, art works, drawings, and maps. **Carnegie**, 2002. **Journal of Vertebrate Paleontology**, 2002.

Magill's Encyclopedia of Science : Animal Life: Respiratory system-zoos Carl W. Hoagstrom, 2002. Covers various aspects of zoology in four volumes, including the behavior, class, evolution, and physiology of both wild and domestic animals. *The British National Bibliography* Arthur James Wells, 2001. *The Writers Directory*, 2013. *The Zoological Record*, 2002.
