Discovering Patterns:

Pattern Detection and Discovery David J Hand, Niall, M. Adams, Richard J. Bolton, 2003-08-02 The collation of large electronic databases of scientific and commercial information has led to a dramatic growth of interest in methods for discovering structures in such databases. These methods often go under the general name of data mining. One important subdiscipline within data mining is concerned with the identification and detection of anomalous, interesting, unusual or valuable records or groups of records which we call patterns. Familiar examples are the detection of fraud in credit card transactions, of particular coincident purchases in supermarket transactions, of important nucleotide sequences in gene sequence analysis and of characteristic traces in EEG records. Tools for the detection of such patterns have been developed within the data mining community but also within other research communities, typically without an awareness that the same problem was common to many disciplines. This is not unreasonable: each of these disciplines has a large literature of its own and a literature which is growing rapidly. Keeping up with any one of these is difficult enough, let alone keeping up with others as well, which may in any case be couched in an unfamiliar technical language. But of course this means that opportunities are being lost: discoveries relating to the common problem made in one area are not transferred to the other area and breakthroughs and problem solutions are being rediscovered or not discovered for a long time, meaning that effort is being wasted and opportunities may be lost.

Data Warehousing and Knowledge Discovery Yahiko Kambayashi, Werner Winiwarter, Masatoshi Arikawa, 2002-08-14 This book constitutes the refereed proceedings of the 4th International Conference on Data Warehousing and Knowledge Discovery DaWaK 2002 held in Aix en Provence, France, in September 2002. The 32 revised full papers presented were carefully reviewed and selected from more than 100 submissions. The papers are organized in topical sections on association rules, clustering, web mining, and security; data mining techniques; data cleansing; applications; data warehouse design; OLAP and data warehouse maintenance.

Advances in Knowledge Discovery and Data Mining Tu Bao Ho, David Cheung, Huan Liu, 2005-05-13 The Pacific Asia Conference on Knowledge Discovery and Data Mining PAKDD is a leading international conference in the area of data mining and knowledge discovery. It provides an international forum for researchers and industry practitioners to share their new ideas, original research results, and practical development experiences from all KDD-related areas, including data mining, data warehousing, machine learning, databases, statistics, knowledge acquisition, and automatic scientific discovery, data visualization, causality induction, and knowledge-based systems. This year's conference PAKDD 2005 was the ninth of the PAKDD series and carried the tradition in providing high quality technical programs to facilitate research in knowledge discovery and data mining. It was held in Hanoi, Vietnam, at the Melia Hotel, 18-20 May 2005. We are pleased to provide some statistics about PAKDD 2005. This year we received 327 submissions, a 37% increase over PAKDD 2004, which is the highest number of submissions since the first PAKDD in 1997, from 28 countries/regions: Australia 33, Austria 1, Belgium 2, Canada 11, China 91, Switzerland 2, France 9, Finland 1, Germany 5, Hong Kong 11.
