Turner M.D, 2008-10-13 Is there evidence for the existence of God Is evolution true and if so is evolution compatible with Christianity These questions face not only students each year but also our modern society as a whole The answers to these questions are important because they will determine our understanding of nature and our relationship with God Dr Turner in his book *Discovering God and His Creation* focuses on these two questions He tells of his lifelong journey in the worlds of faith science and evolution and what he has discovered as he searched for answers He outlines the overwhelming evidence for both the existence of God and evolution and explains how nature cannot be understood without evolution He reveals that the solution to the faith and science dilemma lies in a deeper understanding of the Christian belief that God is a father Dr Turner s journey began with the influence of a father and after completion of graduate studies in evolutionary biology and medical school ended with his realization that evolution is more compatible with Christianity than any other explanation for nature The reasons behind Dr Turner s conclusion are enlightening and will provide a long sought for answer to the standoff between faith and science Dragonfly Behavior Georg Rüppell, Dagmar Hilfert-Rüppell, 2024-12-09 This book is the first to allow you to experience the details of the ultra fast lives of dragonflies these large beautiful flying insects through an abundance of unique snapshots and image sequences Dragonflies are world champions of flight bionic wonders they reveal much about the mysteries of evolution We witness their social interaction and appreciate their success over three hundred million years Dragonflies what an evocative name are easy to observe even for beginners About 80 species live in Germany and every body of water is home to a few They are not shy do not sting and often come very close Perhaps you will fall in love with dragonflies just like the two authors who have been studying them for over 30 years With the knowledge in this book you will look at dragonflies in a completely novel way About the Authors Georg R ppell was Professor of Behavioral Ecology at the Technical University of Braunschweig and has supervised over 300 studies with his working group many of them on dragonflies It was the quick reaction training he got through his teenage sporting activities he finds that helped him to be constantly alert to the abrupt flight movements around
