Discovery Of Insulin:

The Discovery of Insulin Michael Bliss, 2017-06-22 The discovery of insulin at the University of Toronto in 1921-22 was one of the most dramatic events in the history of the treatment of disease. Insulin was a wonder drug with ability to bring patients back from the very brink of death and it was no surprise that in 1923 the Nobel Prize for Medicine was awarded to its discoverers the Canadian research team of Banting, Best, Collip and Macleod. In this engaging and award winning account, historian Michael Bliss recounts the fascinating story behind the discovery of insulin, a story as much filled with fiery confrontation and intense competition as medical dedication and scientific genius. Originally published in 1982 and updated in 1996, *The Discovery of Insulin* has won the City of Toronto Book Award, the Jason Hannah Medal of the Royal Society of Canada and the William H. Welch Medal of the American Association for the History of Medicine.

The Discovery of Insulin Michael Bliss, 2021 The discovery of insulin at the University of Toronto in 1921-22 was one of the most dramatic events in the history of the treatment of disease. Insulin, discovered by the Canadian research team of Frederick Banting, Charles Best, James Collip and John Macleod, was a wonder drug with the ability to bring diabetes patients back from the brink of death. It was no surprise that in 1923 the Nobel Prize for Medicine was awarded for its discovery. In this engaging and award winning account, historian Michael Bliss draws on archival records and personal adventures to recount the fascinating story behind the discovery of insulin, a story as much filled with fiery confrontation and intense competition as medical dedication and scientific genius. With a new preface by Michael Bliss and a foreword by Alison Li, the special centenary edition of *The Discovery of Insulin* honours the one hundredth anniversary of insulin's discovery and its continued significance a century later.

Breakthrough Thea Cooper, Arthur Ainsberg, 2010-09-14 An inspirational account of how a young girl's plight launched a boon for diabetics the world over. A remarkable story worthy reading. Booklist. It is 1919 and Elizabeth Hughes, the eleven year old daughter of America's most distinguished jurist and politician Charles Evans Hughes, has been diagnosed with juvenile diabetes. It is essentially a death sentence. The only accepted form of treatment, starvation, whittles her down to forty five pounds of skin and bones. Miles away, Canadian researchers Frederick Banting and Charles Best manage to identify and purify insulin from animal pancreases, a miracle soon marred by scientific jealousy, intense business competition and fistfights. In a race against time and a ravaging disease, Elizabeth becomes one of the first diabetics to receive insulin injections, all while its discoverers and a little known pharmaceutical company struggle to make it available to the rest of the world. Relive the heartwarming true story of the discovery of insulin as it's never been told before. Written with authentic detail and suspense and featuring walk-ons by William Howard Taft, Woodrow Wilson and Eli Lilly himself among many others. A fascinating tale of Nobel Prize winning research. This book is an important read for anyone with diabetes. It is an enjoyable read for those who love mystery and human drama. Kenneth T. Jackson, Barzun Professor of History, Columbia University.

Insulin Stuart Bradwel, 2023-06-08 In 1922 an unlikely team of researchers in Toronto made one of the most important medical breakthroughs of the century insulin Their discovery seemed miraculous When it was given to diabetic patients on the brink of death their condition rapidly improved Those present could barely believe their eyes they had witnessed resurrection However this was no simple cure Injections must be taken for life Without them symptoms quickly return often with fatal results But while a lifetime on insulin poses great challenges it also offers opportunities In this revelatory history Stuart Bradwel looks back on one of medicine's most celebrated innovations Setting professional narrative against subjective patient experience he tells the story of a drug that has challenged many of the basic assumptions upon which medical practice is built both inside and outside the clinic Nevertheless Bradwel reminds us that the centenary of this apparent wonder drug should be no cause for celebration Insulin often remains inaccessible to those who need it most elusive prescriptions uneven availability and sky high prices result in rationing and desperate do it yourself research and development In the face of bootstraps rhetoric and Pharma Bro capitalists patients across the world are left to fend for themselves There is a long way to go in the twenty first century until insulin truly fulfils the extraordinary promises made by its discovery Also available as an audiobook
