Discouraging Terrorism National Research Council, Division of Behavioral and Social Sciences and Education, Center for Social and Economic Studies, Panel on Understanding Terrorists in Order to Deter Terrorism, 2002-10-24 This report addresses the question of what terrorists hold in value This question is posed in order to assess some means and strategies for deterring deflecting or preventing terrorist activities The report approaches the question on several levels moving from the use of short term deterrent strategies to the modification of the broader contexts and conditions conducive to terrorist activities in the long run The report focuses on contemporary Islamic extremist terrorism but deals with generic dimensions in many instances

Deterring Terrorism Andreas Wenger, Alex Wilner, 2012-09-19 During the Cold War deterrence theory was the cornerstone of U S foreign policy Following the 9 11 terrorist attacks however popular wisdom dictated that terrorist organizations and radical fanatics could not be deterred and governments shifted their attention to combating terrorism rather than deterring it This book challenges that prevailing assumption and offers insight as to when and where terrorism can be deterred It first identifies how and where theories of deterrence apply to counterterrorism highlighting how traditional and less traditional notions of deterrence can be applied to evolving terrorist threats It then applies these theoretical propositions to real world threats to establish the role deterrence has within a dynamic counterterrorism strategy and to identify how metrics can be created for measuring the success of terrorism deterrence strategies In sum it provides a foundation for developing effective counterterrorism policies to help states contain or curtail the terrorism challenges they face

Preparing for the Psychological Consequences of Terrorism Institute of Medicine, Board on Neuroscience and Behavioral Health, Committee on Responding to the Psychological Consequences of Terrorism, 2003-08-26 The Oklahoma City bombing intentional crashing of airliners on September 11 2001 and anthrax attacks in the fall of 2001 have made Americans acutely aware of the impacts of terrorism These events and continued threats of terrorism have raised questions about the impact on the psychological health of the nation and how well the public health infrastructure is able to meet the psychological needs that will likely result Preparing for the Psychological Consequences of Terrorism highlights some of the critical issues in responding to the psychological needs that result from terrorism and provides possible options for intervention The committee offers an example for a public health strategy that may serve as a base from which plans to prevent and respond to the psychological consequences of a variety of terrorism events can be formulated The report includes recommendations for the training and education of service providers ensuring appropriate guidelines for the protection of service providers and developing public health surveillance for preevent and postevent factors related to psychological consequences

Reflections in a Bloodshot Lens Lawrence Pintak, 2006-01-20 There exists today a tragic rift between Americans and the world's Muslims Yet in the immediate aftermath of 9/11 there was widespread sympathy for the US throughout the Muslim world This book explores what happened It examines the disconnect that leads Americans and Muslims to view the same words and images in fundamentally different ways Partly a result of a centuries old us against them dichotomy the problem is exacerbated by an increasingly polarised media and by leaders on both sides who either don't understand or don't care what impact their words and policies have in the world at large *Reflections in a Bloodshot Lens* argues that the Arab media revolution and the rise of patriot journalists in the US marginalised voices of moderation distorting perceptions on both sides of the divide with potentially disastrous results
