**Discourse on bodies in water; tr** Galileo Galilei, Thomas Salusbury, Stillman Drake, **Discourse on Bodies in Water** Galileo Galilei (Astronome, Mathématicien, Physicien, Italie), Stillman Drake (Scientific historian, United States, Canada), 1960 *Discourse on Floating Bodies* Galileo Galilei, 2020-09-28 As to the first the last discoveries of Saturn to be tricorporeall and of the mutations of Figure in Venus like to those that are seen in the Moon together with the Consequents depending thereupon have not so much occasioned the demur as the investigation of the times of the Conversions of each of the Four Medicean Planets about Jupiter which I lighted upon in April the year past 1611 at my being in Rome where in the end I ascertained my selfe that the first and neerest to Jupiter moved about 8 gr I am therefore forced with other Observations and more exact than the former and in times more remote from one another to correct the Tables of such Motions and limit them even to the shortest moment for such exactnesse my first Observations suffice not not only in regard of the short intervals of Time but because I had not as then found out a way to measure the distances between the said Planets by any Instrument I Observed such Intervals with simple relation to the Diameter of the Body of Jupiter taken as we have said by the eye the which though they admit not errors of above a Minute yet they suffice not for the determination of the exact greatness of the Spheres of those Stars But now that I have hit upon a way of taking such measures without failing scarce in a very few Seconds I will continue the observation to the very occultation of JUPITER which shall serve to bring us to the perfect knowledge of the Motions and Magnitudes of the Orbes of the said Planets together also with some other consequences thence arising I adde to these things the observation of some obscure Spots which are discovered in the Solar Body which changing position in that propounds to our consideration a great argument either that the Sun revolves in it selfe or that perhaps other Starrs in like manner as Venus and Mercury revolve about it invisible in other times by reason of their small digressions lesse than that of

Mercury and only visible when they interpose between the Sun and our eye or else hint the truth of both this and that the certainty of which things ought not to be contemned nor omitted     Discourse on Bodies in Water.
