Exploring Classroom Discourse Steve Walsh, 2011-03-08 Routledge Introductions to Applied Linguistics consists of introductory level textbooks covering the core topics in Applied Linguistics designed for those entering postgraduate studies and language professionals returning to academic study The books take an innovative practice to theory approach with a back to front structure which takes the reader from real life problems and issues in the field then enters into a discussion of intervention and how to engage with these concerns The final section

concludes by tying the practical issues to theoretical foundations. Additional features include tasks with commentaries, a glossary of key terms and an annotated further reading section. This book looks particularly at the relationship between language interaction and learning. Providing a comprehensive account of current perspectives on classroom discourse, the book aims to promote a fuller understanding of interaction regarded as being central to effective teaching and introduces the concept of classroom interactional competence (CIC). The case is made in this book for a need not only to describe classroom discourse but to ensure that teachers and learners develop the kind of interactional competence which will result in more engaged dynamic classrooms where learners are actively involved in the learning process. This approach makes an invaluable resource for language teachers as well as students of language and education and language acquisition within the field of applied linguistics.

Discourse Perspectives on Second And/or Foreign Language Teaching and Learning Dogan Yuksel, Banu Inan, 2013. Discourse can be understood as the sum of linguistic usages and metalinguistic manners about a social practice. It examines language in use with the help of the tools that would enable us to get a deeper understanding of what is said or unsaid. Analysis of discourse would help us understand social, cultural, psychological and academic dynamics that are interwoven in the utterances of interlocutors as they use language. This book covers a range of theoretical and applied studies on the examination of discourse in various second and foreign languages learning and teaching contexts. Basically, it includes studies that specifically focus on different aspects of discourse in the teaching of all four skills: reading, writing, listening and speaking. Three theoretical chapters on conducting discourse analysis research, the use of corpus linguistics and historical review of discourse analysis perspectives enrich the scope and content of the book. Researchers from different teaching and learning settings including Turkey, China and the USA contributed to this volume. The target audience of the book are undergraduate and graduate students in different foreign and second language departments and teachers, researchers and academicians of foreign and second languages. *Discourse Perspectives on Second and or Foreign Language Teaching and Learning* will facilitate the understanding of discourse by portraying empirical and theoretical studies on discourse. It covers quite different perspectives: eg sociocultural theory of mind perspective, critical discourse analysis and psychological and or mainstream perspectives of various topics in discourse: eg classroom interaction, written discourse, corpus linguistics, oral interviews, discourse of blogs, technology and discourse etc. The first three chapters provide a review of discourse and how it is conceptualised to various target groups of people: eg graduate students, teachers, researchers and academicians assuming no prior knowledge. The other chapters focus on different aspects of discourse both in and outside the classroom. This book provides teachers, learners and researchers of second and or foreign languages with the tools to analyse and or examine language inside and outside their classrooms.
