Excerpt from Discoveries and Inventions of the Nineteenth Century In the following pages an attempt has been made to present a popular account of remarkable discoveries and inventions which characterize the present century From so large a field selection was of course necessary and the instances selected have been those which appeared to some extent typical or those which seemed to have the most direct bearing on the general progress of our age The topics comprise chiefly those great applications of mechanical engineering physical and chemical science in which every intelligent person feels concerned and a few articles only are devoted to certain purely scientific discoveries which are exciting general interest The Author has aimed at giving a concise but clear description of the several subjects and he has endeavoured to indicate if not to explain the principles involved in each discovery and invention and that without assuming on the part of the reader any knowledge not usually possessed by young persons of either sex who have received an ordinary education The design has been to treat the subjects as familiarly as might be consistent with a desire to impart real information while the popular character of the book has not been considered a reason for regarding accuracy as unnecessary On the contrary pains have been taken to consult the best authorities and it is only because the sources of information to which the Author is under obligation are so many that he cannot acknowledge them in detail A book on a plan somewhat similar to but by no means identical with that of the present work was projected two or three years ago by Mr J H Pepper and in fact several sheets were in type when its progress was permanently interrupted by that gentleman s removal to a distant part of the world About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works      *Classified Catalogue of the Carnegie Library of Pittsburgh, 1895-1902* Carnegie Library of Pittsburgh,1904      **Classified Catalogue of the Carnegie Library of Pittsburgh, 1895- 1902: General works.
