[Catalogue of Title-entries of Books and Other Articles Entered in the Office of the Librarian of Congress, at Washington, Under the Copyright Law ... Wherein the Copyright Has Been Completed by the Deposit of Two Copies in the Office](#) Library of Congress. Copyright Office, 1973 *Community-Based Ethnography* Ernest T. Stringer, Mary Frances Agnello, Sheila Conant Baldwin, Lois McFayden Christensen, Deana Lee Philb Henry, 2014-02-25 Co written by a professor and 10 students this book explores their attempts to come to grips with fundamental issues related to writing narrative accounts purporting

to represent aspects of people's lives. The fundamental project around which their explorations in writing textual accounts turned derived from the editor's initial ethnographic question: Tell me about the previous class we did together. This proved to be a particularly rich exercise bringing into the arena all of the problems related to choice of data, analysis of data, the structure of the account, the stance of the author, tense and case, the adequacy of the account, and more. As participants shared versions of their accounts and struggled to analyze the wealth of data they had accumulated in the previous classes, the products of in-class practice of observation and interview, they became aware of the ephemeral nature of narrative accounts. Reality as written in textual form cannot capture the immense depth, breadth, and complexity of an actual lived experience and can only be an incomplete representation that derives from the interpretive imagination of the author. The final chapter results from a number of discussions during which each contributing author briefly revisited the text and through dialogue with others, and/or the editor identified the elements that would provide an overall framework that represents the big message of the book. In this way, the contributors attempted to provide a conceptual context that would indicate ways in which their private experiences could be seen to be relevant to the broader public arenas in which education and research is engaged. In its entirety, the book presents an interpretive study of teaching and learning. It provides a multi-voiced account that reveals how problematic, turning-point experiences in a university class are perceived, organized, constructed, and given meaning by a group of interacting individuals.

Objectives, Methods, and Evaluation for Secondary Teaching. Michael A. Lorber, 1996. The fourth edition of *Objectives, Methods, and Evaluation for Secondary*

Teaching does more than provide a useful guide for planning teaching and evaluating. Unlike most other methods texts, this book focuses on helping teachers decide what they want their students to learn, how their students can use the information and skills, and how they as teachers can determine if the instructional objectives have been achieved. Most of these questions have philosophical roots, so the text begins by building a foundation consisting of philosophic viewpoints, historical landmarks in education, and learning theories. These foundation points are then continually referred to in order to help students link theory with practice. This text also incorporates a number of features not found in other texts. Among these are discussions of current goals discussed by the national councils in various subject areas, the factors inhibiting greater use of computers in schools, the implication of developments such as E-mail and the Internet, and multiculturalism. This text will help students better understand the problems and possible solutions, sound instructional plan, and implement that plan by involving students in activities concerning relevant content. It is an invaluable reference guide for both students and educators and a tool that will enable students to engage in more meaningful discussions both in and outside the classroom. *Kansas Studies in Education*, University of Kansas, School of Education, 1974. **Teaching: Vantage Points for Study**, Ronald T.
