Disintegration Of Political Systems War And Revolution In Comparative Perspective:

The Disintegration of Political Systems Manus I. Midlarsky, 1986 *Handbook of War Studies II* Manus I.

Midlarsky, 2000 Essays reflecting the most recent theoretically and empirically oriented research on international warfare

The Internationalization of Communal Strife (Routledge Revivals) Manus I. Midlarsky, 2014-06-03 First published in 1992 this edited collection argues that conflicts have a growing tendency both to intensify and to lengthen thus increasing the likelihood of external actors being drawn into the on going violence Here leading experts in comparative and international politics examine this tendency of communal conflicts to spill over into the international arena They also look at the conditions under which these processes do not occur and are mediated successfully The authors combine theoretical perspectives with case studies covering examples from the origins of the First World War to state building in Iraq and whether it was a precursor of the Iran Iraq War and the Gulf Crisis They present both a global overview and a focus on the state as the single most important intermediary in the internationalization process A comprehensive and relevant reissue this volume will appeal to students and scholars of International Relations Comparative Politics and Strategic Studies Raimo Väyrynen: A Pioneer in International Relations, Scholarship and Policy-Making Raimo Väyrynen, 2023-01-03 This book provides a broad overview of Professor Raimo Väyrynen's academic work his role in international research organizations and his contributions to policy debates It offers an interesting review of important political issues during the time span of half a century from disarmament in Europe to the changing relationship between state sovereignty and transnational forces Väyrynen has dealt with the changing agenda of peace and international relations security and the arms race and the world economy This book provides comprehensive analyses of the regional and systemic structure of international relations with the emphasis on conflicts and warfare between nations It argues that while states even smaller ones still matter transnational issues are increasingly important Taking a historical perspective the articles suggest that large scale violence and arms races have been recurrent and cyclical phenomena in international relations These events reflect the deep seated inequalities in the political and economic systems which moreover vary considerably between regions The publication is important reading for any researcher as well as students policy makers and the science oriented public at large Traces the changing agenda of international relations from disarmament and the world economy to the changing relationship between state sovereignty and transnational forces Provides analyses of the regional and systemic structure in international relations with the emphasis on conflicts and warfare Argues that large scale violence and the arms race have been recurrent and cyclical phenomena in international relations Reviews important political issues from peace and conflict in Europe to the changing power relationship in the world **Imperial Ends** Alexander J. Motyl, 2001-08-01 Despite their historical importance empires have received scant attention from social scientists Now Alexander J Motyl examines the structure dynamics and continuing relevance of empire and asks Why do empires decline Why do some empires collapse And why do some collapsed empires

revive Rejecting choice centered theories of imperial decline Motyl maintains that the very structure of empires promotes decay and that decay in turn facilitates the progressive loss of territory Although most major empires have in fact declined in this manner some such as the Soviet Union have collapsed suddenly and comprehensively Motyl explains how and why collapse occurs why such an outcome is hard to foresee and why some collapsed empires revive While broad ranging historically and empirically *Imperial Ends* focuses on five modern empires the Soviet Romanov Ottoman Habsburg and Wilhelmine Examining the possibility of a revival of the Soviet empire Motyl points out that the expansion of NATO and the European Union along with increasing globalization will isolate Russia and its neighbors promoting their dependence upon one another and perhaps facilitating the rise of the former core With boldly stated conclusions and concise analytical interpretations *Imperial Ends* cohesively illustrates to policymakers and social scientists alike the importance of possible imperial revivals and the rise of future empires

Leadership and Politics Bryan D. Jones, 1989 In twelve essays influential scholars in political science explore the meaning of political leadership from the kaleidoscopic perspectives of the leaders institutions goals procedures problems and traditions involved The approaches as varied as the subject itself coalesce around the central question of how leaders interact with transform or are controlled by the organizations they lead

Domestic Sources of Global Change Zeev Maoz, 1996 Examines the relationship between domestic politics and international politics

Handbook of War Studies Manus I. Midlarsky, 1993 A comprehensive view of our understanding of the causes of war

Inequality and Contemporary Revolutions Manus I. Midlarsky, 1986

Political Science: The theory and practice of political science William J. Crotty, 1991 In this volume the study of legislatures has traditionally been a central preoccupation of political scientists Legislatures provide good laboratories for testing theories and methodologies of significance in the discipline and more broadly for contributing to an understanding of how representative government works

On Global War William R. Thompson, 1988 In this study of the five periods of global war the author highlights areas of analytical overlap and divergence The principal goal of the book is that of advancing our understanding about why these wars have been fought and whether we should anticipate more global wars in the future

Comparing State Politics

Michael J. Sullivan, 1996-05-16 Since the end of the Cold War many new countries have been created and several new wars have broken out resulting in new forms of politics and government for which Cold War paradigms are inadequate Using extensive exhibits this book provides a comparative framework for understanding governance in today's world The author selects 100 countries as worthy of greater investigation highlighting 50 of them as prone to ethnic based problems and 33 as beset by violent domestic conflict and provides a comparative political analysis of their governing structures The 100 countries covered are spread equitably across five geographical zones Europe Islamic Zone Africa Asia and the Western Hemisphere Dividing the 100 selected states into polity types the author studies five civilian polities encompassing 50 states and five military polities embracing another 50 states The volume relates polity types to the ethnic and military challenges

facing them and analyzes the phenomena of nationalism and militarism In addition to numerous tables and other exhibits the author uses Formats of Analysis for the orderly display of comparative data on states of particular polity types This study provides the student of comparative politics with analytic and conceptual tools to understand governance in the post Cold War world The work is a worthy addition to the literature of comparative political analysis *War* Paul F. Diehl, 2005

Subject Guide to Books in Print, 1993 **Peace Research** Peter Wallensteen, 1988-11-02 Comprising essays by Peter Wallensteen this book presents an overview of the thematic development of peace research which has become one of the most dynamic and innovative areas of war and conflict studies Peace research began in the 1950s when centres were formed in the USA and Europe and today there are research institutes and departments on every continent with teaching and research programs in most countries and peace researchers contribute to the development of international studies development research and security analysis Prof Wallensteen has been a witness to much of this since forming the Department of Peace and Conflict Research at Uppsala University in the late 1960s and this book brings together thirteen of his articles with five new essays in one volume The book presents articles on such key issues in peace research as the causes of war conflict data conflict diplomacy non violent sanctions and third party diplomacy In this way it demonstrates how basic research can be conducted in fields often seen as unresearchable and too complicated to deal with This volume shows that it is a matter of developing definitions creating valid measures and finding ways of collecting information recognising that innovations of this kind require supportive research environments Furthermore the results are not only useful for the growth of research activity itself but for finding ways of dealing with actual conflicts Thus attention is also paid here to conflict prevention peace agreements sanctions and third party activity for preventing and ending armed conflict and building a lasting post war peace This book will be of great interest to all students of peace studies conflict resolution war and conflict studies development studies and IR security studies in general *The Analysis of International Relations* Karl Wolfgang Deutsch, 1988 This book focuses on the decision making capability of nation states and their vulnerability to error as well as dramatic global changes and changes in the needs and behavior of large segments of the population The author examines theories of game and conflict general systems and communication and control New to this edition is a chapter dealing with international terrorism and clandestine warfare **Measuring Global Values** Michael J. Sullivan, 1991-07-18 Measuring Global Values is a major book that represents an enormous research effort The book enables careful and systematic comparisons over time and across space as to whether a society is improving or losing ground It provides world order scholars with a fully elaborated framework for future research Sullivan s book is certain to be the foundational work for future developments relating to normative assessment Richard Falk Princeton University This volume profiles 162 countries using as a basis for comparison more than a hundred indicators measuring how each country reflects 5 global values peace economic well being ecological balance social justice and political participation The use of data based management software

systems for the collection of information results in a broad based analysis which yields thoroughly documented conclusions and affirms the five values as appropriate evaluative tools Introductory material outlines the methods used in the study defines the measurement criteria and identifies the study s objectives Each of the five subject areas is then addressed separately its findings supported by numerous tables and excerpts and its data supplemented by a bibliography at the end of each chapter Students of political science as well as global policy scholars will consider this unique application of current technology to the examination of global values a significant contribution to literature on the subject
