Smart and Sustainable Technology for Resilient Cities and Communities Robert J. Howlett, Lakhmi C. Jain, John R. Littlewood, Marius M. Balas, 2022-02-25 This book is a collection of extended versions of papers presented at the KES Covid 19 Challenge international summit. The book focusses on technological, economic and social developments to combat the effects of global and local disasters as well as the ways in which the recovery from Covid can be used to build more resilient and sustainable communities, industry and improve the environment. It also discusses the global challenges of human influenced climate change. There are chapters on making cities and communities more resilient through energy self sufficiency, food production, resilient housing and buildings, human health and intelligent systems e.g. for forecasting and prediction.

Co-Learning in Higher Education Edward P. St. John, 2022-11-14 Co-Learning in Higher Education addresses topics critical to the future of higher education: the wellbeing of communities, engagement of scholars, supporting new generations of social activists and the renewal and expansion of educational and career pathways. It develops a theory of co-learning that engages students and professors across generations in partnerships with community organizations, schools and corporations that solve emerging social and environmental challenges. Collaboratively written cases discuss community projects, engaging pedagogies and action research projects. These co-cases demonstrate the power of using critical pedagogies and social action within troubling contexts rather than assuming public policy changes are the only solution. Contributors explore mentoring, discuss pedagogies that promote community wellbeing and equity, address the urgency of change in universities and reflect on the implications of this chaotic period for empowering social agency among youth in rising generations. This is a timely volume for scholars and students in higher education and educational policy.

Loide Monteiro, Foundation Smart City Cape Verde; Prof. Teodora Vuckovic, University of Novi Sad; Prof. Susana Sargento, University of Aveiro; Prof. Andy Van Den Dobbela, TU Delft; and Prof. Juan Corchado, University of Salamanca.
