How Do You Remote Customer Service Jobs Ideas With Low Investment:

Regional Policy Ugo Fratesi, 2023-11-08 Regional policy is an essential in any government's toolkit for promoting socioeconomic prosperity. It comes in many forms and can be used to target the development of weak and stronger regions. This textbook provides comprehensive and systematic coverage of regional policy, dealing with core theories and looking at contemporary challenges in practice, addressing regional policy across the world. Structured in four parts, the book opens with an exploration of regional policy's characterisation, aims, and rationale. The second part is devoted to issues of implementation and the instruments available to policymakers for intervention. The third part addresses regional policy evaluation, as well as statistics and modelling in policymaking. Finally, the book discusses how regional policy is applied in different contexts. Each chapter contains real-life examples of a regional policy topic in action and highlights supplementary topics for advanced readers. With its broad coverage of the subject, *Regional Policy: Theory and Practice* will prove a valuable resource for advanced students, researchers, and practitioners in regional policy, regional economics, economic geography, planning, and public policy.

Ideas, Institutions, and Interests Peter W.B. Phillips, David Castle, 2022-03-31 Canada's thirteen provinces and territories are significant actors in Canadian society, directly shaping cultural, political, and economic domains. Regions also play a key role in creating diversity within innovative activity. The role of provinces and territories in setting science, technology, and innovation policy is, however, notably underexplored. *Ideas, Institutions, and Interests* examines each province and territory to offer real-world insights into the complexity and opportunities of regionally differentiated innovation policy in a pan-continental system. Contributing scholars detail the distinctive ways in which provinces and territories articulate ideas and interests through their institutions, programs, and policies. Many of the contributing authors have engaged first-hand with either micro or macro-level policy innovation and are innovation leaders in their own right, providing invaluable perspectives on the topic. Exploring the vital role of provinces in the last thirty years of science, technology, and innovation policy development and implementation, *Ideas, Institutions, and Interests* is an insightful book that places innovation policy in the context of multilevel governance.
