Machine Habitus Massimo Airoidi, 2021-12-13 We commonly think of society as made of and by humans but with the proliferation of machine learning and AI technologies this is clearly no longer the case Billions of automated systems tacitly contribute to the social construction of reality by drawing algorithmic distinctions between the visible and the invisible the relevant and the irrelevant the likely and the unlikely on and beyond platforms Drawing on the work of Pierre Bourdieu this book develops an original sociology of algorithms as social agents actively participating in social life Through a wide range of examples Massimo Airoidi shows how society shapes algorithmic code and how this culture in the code guides the practical behaviour

of the code in the culture shaping society in turn The machine habitus is the generative mechanism at work throughout myriads of feedback loops linking humans with artificial social agents in the context of digital infrastructures and pre digital social structures Machine Habitus will be of great interest to students and scholars in sociology media and cultural studies science and technology studies and information technology and to anyone interested in the growing role of algorithms and AI in our social and cultural life *ICCWS 2019 14th International Conference on Cyber Warfare and Security* Noëlle van der Waag-Cowling, Louise Leenen, 2019-02-28 Perspectives in digital health and big data in medicine: Current trends, professional challenges, and ethical, legal, and social implications João Valente Cordeiro, Liliana Laranjo, 2023-10-25 PC AI, 1998 *Billboard*, 1943-05-01 In its 114th year Billboard remains the world's premier weekly music publication and a diverse digital events brand content and data licensing platform Billboard publishes the most trusted charts and offers unrivaled reporting about the latest music video gaming media digital and mobile entertainment issues and trends Sight and Sound, 1998 Popular Science, 2006-04 Popular Science gives our readers the information and tools to improve their technology and their world The core belief that Popular Science and our readers share The future is going to be better and science and technology are the driving forces that will help make it better *Science* John Michels (Journalist), 2010
