Technology and Language Learning Eric Frigal, Wing Yee Jenifer Ho, 2025-12-22 Technology and Language Learning Effective Podcasting and Video Based Language Teaching Practices in the Age of Generative AI provides English language teachers with a practical guide to integrating podcasting video based materials and Generative AI GenAI technologies into their classrooms Focused on ESL EFL and ELT the book demonstrates how these tools enhance engagement accessibility and autonomy while fostering skills like listening comprehension vocabulary development and creative language use Teachers will find strategies for using podcasts in flipped classrooms designing authentic video activities and guiding students in creating multimodal content The book highlights GenAI tools like ElevenLabs Canva and Synthesia for generating adaptive accessible materials tailored to diverse learners Addressing challenges and opportunities it emphasizes balancing AI generated content with authentic language practice Real world examples and case studies illustrate practical applications in culturally sensitive and inclusive ways Whether in traditional hybrid or online settings it offers actionable guidance for leveraging digital tools as transformative components of modern pedagogy preparing students to thrive in a GenAI driven globally connected world By bridging research and practice this textbook empowers teachers and practitioners to reimagine classrooms as dynamic spaces where technology supports creativity collaboration and critical thinking

Echoes Of Experience Arokia Lawrence Vijay, 2025-04-06 Echoes of Experience Stories of Learning Language and Innovation is a celebration of creativity collaboration and transformative learning This book brings together a collection of innovative projects undertaken by students as part of the Fluency Through Practice initiative an experiential learning journey designed to enhance language proficiency and employability skills through real world applications This book showcases the outcomes of the Fluency Through Practice initiative where project based learning a globally recognized and highly effective teaching methodology was implemented to bridge the gap between theoretical knowledge and practical application By immersing students in real world scenarios this approach fosters critical thinking collaboration creativity and effective communication skills all of which are essential for their professional and personal growth This book stands as a

testament to what can be achieved when learning transcends traditional boundaries and is driven by passion curiosity and hands on experience It showcases the remarkable journey of students who dared to think differently apply their knowledge creatively and embrace the challenges of real world communication Whether you are an educator student or professional Echoes of Experience Stories of Learning Language and Innovation offers insights and inspiration into how practical learning experiences can shape confident communicators and future leaders Join us in celebrating these voices of change and the stories that speak beyond words

A Human Algorithm Flynn Coleman,2019-10-01 A groundbreaking narrative on the urgency of ethically designed AI and a guidebook to reimagining life in the era of intelligent technology The Age of Intelligent Machines is upon us and we are at a reflection point The proliferation of fast moving technologies including forms of artificial intelligence akin to a new species will cause us to confront profound questions about ourselves The era of human intellectual superiority is ending and we need to plan for this monumental shift A Human Algorithm How Artificial Intelligence Is Redefining Who We Are examines the immense impact intelligent technology will have on humanity These machines while challenging our personal beliefs and our socioeconomic world order also have the potential to transform our health and well being alleviate poverty and suffering and reveal the mysteries of intelligence and consciousness International human rights attorney Flynn Coleman deftly argues that it is critical that we instill values ethics and morals into our robots algorithms and other forms of AI Equally important we need to develop and implement laws policies and oversight mechanisms to protect us from tech s insidious threats To realize AI s transcendent potential Coleman advocates for inviting a diverse group of voices to participate in designing our intelligent machines and using our moral imagination to ensure that human rights empathy and equity are core principles of emerging technologies Ultimately A Human Algorithm is a clarion call for building a more humane future and moving conscientiously into a new frontier of our own design Coleman argues that the algorithms of machine learning if they are instilled with human ethics and values could bring about a new era of enlightenment San Francisco Chronicle

The Rise of Metacreativity Eduardo Navas,2022-11-18 This book brings together history and theory in art and media to examine the effects of artificial intelligence and machine learning in culture and reflects on the implications of delegating parts of the creative process to AI In order to understand the complexity of authorship and originality in relation to creativity in contemporary times Navas combines historical and theoretical premises from different areas of research in the arts humanities and social sciences to provide a rich historical and theoretical context that critically reflects on and questions the implications of artificial intelligence and machine learning as an integral part of creative production As part of this the book considers how much of postproduction and remix aesthetics in art and media preceded the current rise of metacreativity in relation to artificial intelligence and machine learning and explores contemporary questions on aesthetics The book also provides a thorough evaluation of the creative application of systematic approaches to art and media production and how this in effect percolates across disciplines including art design communication as well as

other fields in the humanities and social sciences An essential read for students and scholars interested in understanding the increasing role of AI and machine learning in contemporary art and media and their wider role in creative production across culture and society *What the Tech?* Rachele Dene Poth, 2025 With artificial intelligence AI augmented reality AR virtual reality VR blockchain non fungible tokens NFTs the metaverse and Web3 being used in the world of work and education students need opportunities to learn about explore and create with emerging technologies At the same time educators need the right resources to stay current with the changes and be able to provide the guidance students need to develop the skills that are essential today and are likely to be in demand for the jobs of the future Based on a course developed by the author this book explores how to create impactful learning experiences so that students can apply their knowledge to real world problems collaborate with peers from around the world and develop critical thinking skills while expanding their understanding of the world and their place in it 2020 Complete Stablecoin Guide Koosha Azim, Alyze Sam, 2020-01-22

Gunkel, 2023-09-05 Why robots defy our existing moral and legal categories and how to revolutionize the way we think about them Robots are a curious sort of thing On the one hand they are technological artifacts and thus things On the other hand they seem to have social presence because they talk and interact with us and simulate the capabilities commonly associated with personhood In *Person Thing Robot* David J Gunkel sets out to answer the vexing question What exactly is a robot Rather than try to fit robots into the existing categories by way of arguing for either their reification or personification however

Gunkel argues for a revolutionary reformulation of the entire system developing a new moral and legal ontology for the twenty first century and beyond In this book Gunkel investigates how and why efforts to use existing categories to classify robots fail argues that robot designates an irreducible anomaly in the existing ontology and formulates an alternative that restructures the ontological order in both moral philosophy and law Person Thing Robot not only addresses the issues that are relevant to students teachers and researchers working in the fields of moral philosophy philosophy of technology science and technology studies STS and AI robot law and policy but it also speaks to controversies that are important to AI researchers robotics engineers and computer scientists concerned with the social consequences of their work **Science**
