

The background of the slide features a low-angle shot of the Statue of Liberty against a blue sky with wispy clouds. The statue's right arm is raised, holding a torch that emits a thick plume of white smoke. The overall color palette is dominated by blues and greys, with the yellow text providing a sharp contrast.

Incarcerating the Crisis Jordan T. Camp, 2016-04-18 The United States currently has the largest prison population on the planet Over the last four decades structural unemployment concentrated urban poverty and mass homelessness have also become permanent features of the political economy These developments are without historical precedent but not without historical explanation In this searing critique Jordan T Camp traces the rise of the neoliberal carceral state through a series of turning points in U S history including the Watts insurrection in 1965 the Detroit rebellion in 1967 the Attica uprising in 1971 the Los Angeles revolt in 1992 and events in post Katrina New Orleans in 2005 Incarcerating the Crisis argues that these dramatic events coincided with the emergence of neoliberal capitalism and the state's attempts to crush radical social movements Through an examination of the poetic visions of social movements including those by James Baldwin Marvin Gaye June Jordan Jos Ram rez and Sunni Patterson it also suggests that alternative outcomes have been and continue to be possible

Freedom and Crisis Allen Weinstein, 1981

Ugly Freedoms Elisabeth R. Anker, 2021-10-25 In *Ugly Freedoms* Elisabeth R Anker reckons with the complex legacy of freedom offered by liberal American democracy outlining how the emphasis of individual liberty has always been entangled with white supremacy settler colonialism climate destruction economic exploitation and patriarchy These ugly freedoms legitimate the right to exploit and subjugate others At the same time Anker locates an unexpected second type of ugly freedom in practices and situations often dismissed as demeaning offensive gross and ineffectual but that provide sources of emancipatory potential She analyzes both types of ugly freedom at work in a number of texts and locations from political theory art and film to food toxic dumps and multispecies interactions Whether examining how Kara Walker's sugar sculpture *A Subtlety* Or the Marvelous Sugar Baby reveals the importance of sugar plantations to liberal thought or how the impoverished neighborhoods in *The Wire* blunt neoliberalism's violence Anker shifts our perspective of freedom by contesting its idealized expressions and expanding the visions for what freedom can look like who can exercise it and how to build a world free from domination

Handbook of the Anthropocene Nathanaël Wallenhorst, Christoph Wulf, 2023-08-21. This Handbook is a collection of contributions of more than 300 researchers who have worked to grasp the Anthropocene, this new geological epoch characterised by a modification of the conditions of habitability of the Earth for all living things in its biogeophysical and socio-political reality. These researchers also sought to define a historical and prospective anthropology that integrates social, economic, cultural and political issues as well as of course environmental ones. What are the anthropological changes needed to ensure that our human adventure will be able to continue in the Anthropocene? And what are the educational and political issues involved? Anthropocene is fast becoming a widely used term, but thus far there has been no reference work explaining the thoughts of the greatest experts of the present day on this subject at the intersection of biogeophysical and socio-political knowledge. A scientific and political concept, but which is also the conceptual vehicle for conveying the scientific community's sense of concern, this complex term is explained by international experts as they reflect on scientific arguments taking place in earth system science, the social sciences and the humanities. What these researchers from different disciplines have in common is a healthy concern for the future and how to prepare for it in the Anthropocene, and also the identification of possible anthropological changes. This Handbook encourages readers to immerse themselves in reflections on the human adventure through descriptions of our differing heritages and the future that is in the process of being written.

Peace or Democracy? Izabela Pereira Watts, 2023-04-03. Contrary to the common belief that peace and democracy go hand in hand after a civil war, Pereira Watts argues they are in fact at a crossroads. Offering an innovative framework based on Philosophical Actors and Tactical considerations, Pereira Watts identifies 14 dynamic dilemmas in democratic peacebuilding with respective trade-offs. She focuses on explaining the contradictions in modern post-conflict recovery, the challenges facing interim governments and the international community's role. Based on an analysis of more than 40 countries between 1989 and 2022 and more than 60 UN peace operations, she presents critical issues that commonly need to be addressed in such scenarios: Elections and Political Parties, the Constitution, Checks and Balances and Power sharing, Transitional Justice, Human Rights, Amnesty, Truth Commissions and War Crimes Tribunals, Disarmament, Demobilization and Reintegration, and Media Reform and Civil Society. Solving any of these dilemmas leads to others that shape a complex apparatus for restoring peace and installing a new political regime. An essential resource for decision-takers, policymakers, international analysts and practitioners in the field of peacebuilding that will also

be of great value to students of International Relations and Peace Studies as well as anyone interested in peacekeeping democracy building and state building *Journalism and Safety* Oscar Westlund, Roy Krøvel, Kristin Skare Orgeret, 2024-06-03 This volume presents key international research on journalism and safety with a focus on conceptual global and transnational approaches as well as conflict challenges and consequences for democracy It offers an overview of the latest research and ongoing developments in the field of journalism and safety and speaks to the ways in which digital developments have worsened the risks surrounding journalists with online harassments security breaches surveillance and so forth challenging their safety like never before The first of two volumes this book comprises a handpicked collection of cutting edge research articles authored by distinguished international scholars The chapters in the book were originally published in Digital Journalism Journalism Studies and Journalism Practice during the years 2019 2023 and have thus been through rigorous double blind peer review The chapters draw on data from diverse geographical locations such as U S Syria Yemen Libya Iraq Palestine Latin America Pakistan Philippines Afghanistan Venezuela Ethiopia and Slovakia The first section of the book focuses on research that either has made significant conceptual advancements on journalism and safety and or has contributed with global or transnational approaches and the second section focuses on challenges in conflict coverage and the impact it has on democracies This collection offers important points of entry for understanding this area of research and insights into worthwhile concepts and approaches that can be used to further study and advance knowledge It will be a key resource for scholars practitioners and researchers of journalism media and cultural studies communication studies and sociology while also being of interest to those seeking an introduction to the field
