Muhammad, Melanie-Angela Neuilly, 2019-06-14 Mothering from the Field offers both a mosaic of perspectives from real women scientists experiences of conducting field research while raising children and an analytical framework to understand how we can redefine

methodological and theoretical contributions based on mothers experiences in order to revolutionize how we conceptualize research

Critical Archaeology in the Digital Age Kevin Garstki, 2022-02-01 Every part of archaeological practice is intimately tied to digital technologies but how deeply do we really understand the ways these technologies impact the theoretical trends in archaeology how these trends affect the adoption of these technologies or how the use of technology alters our interactions with the human past This volume suggests a critical approach to archaeology in a digital world a purposeful and systematic application of digital tools in archaeology This is a call to pay attention to your digital tools to be explicit about how you are using them and to understand how they work and impact your own practice The chapters in this volume demonstrate how this critical reflexive approach to archaeology in the digital age can be accomplished touching on topics that include 3D data predictive and procedural modelling digital publishing digital archiving public and community engagement ethics and global sustainability The scale and scope of this research demonstrates how necessary it is for all archaeological practitioners to approach this digital age with a critical perspective and to be purposeful in our use of digital technologies

Archaeology Beyond Dialogue Ian Hodder, 2003 Table of contents

Place and Memory Julian Thomas, Matt Leivers, Julia Roberts, Rick Peterson, 2007 This volume is concerned with the investigation of three complexes of prehistoric ceremonial monuments in the immediate environs of Dumfries in the south west of Scotland conducted between 1994 and 1998 These were the Pict's Knowe henge the Hollywood cursus complex and the post alignments cursus at Holm The field research was designed in such a way as to recognise that prehistoric monuments often have complex and individual sequences of construction and use while also acknowledging that detailed studies of particular sites and local contexts will ultimately advance our understanding of monumentality in prehistoric Europe The three sites of the Pict's Knowe Hollywood and Holm have proved especially helpful in addressing questions of how particular places maintained their importance over long periods of time In each instance the location was characterised by features which possess a high degree of archaeological visibility In the former case it was the upstanding

earthwork of the bank and ditch that identified the site as a henge monument while Holywood and Holm were discovered through aerial photography Each of the sites investigated had complex sequences of development in which the structural elements that were recognised prior to fieldwork were not necessarily the most important or the most long lived This book considers the details of the excavated features environmental and artefactual evidence as well as more general concerns The first part of the volume concentrates on the Pict s Knowe while the second looks at the more spatially and typologically related sites of Holywood and Holm
