Molitoris, 2005 ICU nephrology is rapidly emerging as an area of interest in nephrology Nephrologists have always participated in the care of critically ill patients including those with electrolyte and acid base disorders volume disorders hypertensive crisis and acute renal failure Increased recognition of the overlap between critical care and nephrology and recent advances in the understanding of acute renal failure and the application of renal replacement therapies have brought increased attention to the nephrologist's role in the ICU This handbook is written to provide an approach for the student of nephrology at any level of training with regards to critically ill patients This book provides the essential information necessary to provide care for the nephrology patient in the ICU highlighting physiology and pathophysiology to supplement the clinical diagnostic and therapeutic information **Critical Care Nephrology and Renal Replacement Therapy in Children** Akash Deep, Stuart L. Goldstein, 2018-08-17 This book represents an invaluable resource for professionals for the diagnosis and treatment of acute kidney injury AKI in children and how to select and deliver the appropriate form of renal replacement therapy RRT Experts from all over the globe have come together to share their wide experience in the field of Critical Care Nephrology in children Paediatric critical care nephrology is a complex and highly specialised field presenting challenges and management strategies that are often quite distinct from those seen in adult practice Therefore it is high time to address all the topics in the field of critical care nephrology in children in a unique book which is the first of its kind This book covers the basics as well as advances in the field of Critical Care Nephrology Each chapter is dedicated to practical aspects of a particular topic elucidating various management decision points Each chapter is also accompanied with algorithms figures and protocols in tabulated format Information on how to manage specific conditions are contextualized with relevant background anatomy physiology and biochemistry and practical examples At the end of the chapter there are key learning points Paediatricians nephrologists and paediatric intensivists as well as paediatric critical care and nephrology nurses in all countries will find this book an invaluable reference text Nephrology, An Issue of Critical Care Clinics John Kellum, 2015-10-12 Dr John Kellum has assembled an essential update on the topic of Nephrology as it relates to Critical Care Medicine Articles include Diagnostic criteria Biomarkers for AKI Sepsis induced AKI Drug induced AKI Cardio renal syndrome Surgery Associated AKI Contrast induced AKI Principles of Fluid Therapy Fluid composition and clinical effects Renal replacement therapy and Understanding acid base Acute Kidney Injury, An Issue of Critical Care Clinics John Kellum, Dana Fuhrman, 2021-03-25 This issue of Critical Care Clinics guest edited by Drs John Kellum and Dana Fuhrman focuses on Acute Kidney Injury This is one of four issues each year selected by the series consulting editor Dr John Kellum Articles in this issue include but are not limited to Acute Kidney Injury and Disease AKI in Cardiac Surgery AKI in Sepsis

Koyner, Joel Michels Topf, Edgar V. Lerma, 2021 **Basic Principles of Critical Care Nephrology** Nadezda Petejova, 2017 Acute kidney injury AKI is a common diagnosis in daily clinical practice occurring in virtually all fields of medicine Critically ill patients are especially prone to the development of AKI due to frequent haemodynamic instability multiple risk factors and diagnostic and or treatment complications Severe AKI substantially prolongs the intensive care unit ICU length of stay with increased risk of death AKI is also a predisposing factor for multiple organ dysfunction syndrome and is usually a part of it For these and other reasons critical care nephrology plays an irreplaceable role in treating critically ill patients in ICUs The current trend in medicine generally not only in critical care nephrology is to gather as much scientific knowledge as possible and in medicine everything is interrelated Further knowledge of pathophysiology and understanding the causes of illness come in an era of increasing polypharmacy and the escalating side effects of drugs The latter can cause conditions with the same clinical picture as immune system disorders viruses and bacteria Another issue is poisonings and drug intoxications which are a daily issue in ICU settings In short the aetiological spectrum of disease has expanded This book presents the basic principles in critical care nephrology and covers the epidemiology pathophysiology the most frequent syndromes poisonings and conservative or invasive treatment options The aim is to present an easily understandable overview using relevant scientific research results along with the authors own practical clinical experience from the University Hospital of Ostrava in the Czech Republic The authors believe that this textbook will be useful to physicians who have to make rapid diagnoses and decision making in daily ICU practice Cardiorenal Syndromes in Critical Care Claudio Ronco, Rinaldo Bellomo, Peter A.
