PaO <sub>2</sub>	80 - 100 mmHg	< 80 mmHg (Hypoxemia)
HCO <sub>3</sub> <sup>-</sup>	22 - 28 mEq/L	> 28 mEq/L (Metabolic Acidosis) < 22 mEq/L (Metabolic Alkalosis)

## **Critical Care Study Guide:**

**Critical Care Study Guide** Gerard J. Criner, Rodger E. Barnette, Gilbert E. D'Alonzo, 2010-06-27 Critical care medicine is a dynamic and exciting arena where complex pathophysiologic states require extensive knowledge and up to date clinical information. An extensive knowledge of basic pathophysiology as well as awareness of the appropriate diagnostic tests and treatments that are used to optimize care in the critically ill is essential. Since our first edition 7 years ago new information crucial to the care and understanding of the critically ill patient has rapidly accumulated. Because this knowledge base crosses many different disciplines a comprehensive multidisciplinary approach presenting the information is essential similar to the multidisciplinary approach that is used to care for the critically ill patient. We have strived to provide this content in an easily digestible format that uses a variety of teaching tools to facilitate understanding of the presented concepts and to enhance information retention. To meet the demand to provide comprehensive and diverse education in order to understand the pathogenesis and optimum care of a variety of critical illnesses we have substantially revised the prior topics in the first edition with updated information. We have also markedly expanded the number of topics covered to include acute lung injury and the acute respiratory distress syndrome an expanded discussion of the physiology and operation of mechanical ventilation obstetrical care in the ICU neurosurgical emergencies acute coronary syndromes cardiac arrhythmias role of whole body rehabilitation in the ICU ethical conduct of human research in the ICU and nursing care of the ICU patient. **Pediatric**

**Critical Care Study Guide** Steven E. Lucking, Frank A. Maffei, Robert F. Tamburro, Neal J. Thomas, 2012-04-10 This is the first comprehensive study guide covering all aspects of pediatric critical care medicine. It fills a void that exists in learning resources currently available to pediatric critical care practitioners. The major textbooks are excellent references but do not allow concise reading on specific topics and are not intended to act as both text and study guide. There are also several handbooks available but these are usually written for general pediatric residents and lack the advanced physiology and pathophysiology required for the higher level pediatric critical care practitioner. *Critical Care Study Guide* Gerard J. Criner, Gilbert E. D'Alonzo, 2002 This is the first comprehensive study guide covering all aspects of Critical Care Medicine. The condensed format of coverage is unique it supplies a heavily illustrated text with self assessment questions and answers. This approach will help the reader to determine the correct answer. The text is supported by case studies tables and illustrations which will describe important procedures. Also the selected readings and references will focus on the field's leading major references so this book will be the ideal complement to previously published literature. This is useful for physicians and those in training who see patients in the ICU. **Study Guide to Core Curriculum for Critical Care Nursing** Maurene A.
