Critical Choices And Critical Care Catholic Perspectives On Allocating Resources In Intensive Care Medicine:

Critical Choices and Critical Care Kevin Wm. Wildes,2012-12-06 Critical Choices and Critical Care brings together the traditional reflections on ordinary and extraordinary means with Catholic social thought It examines the difficult questions on the allocation of high technology resources used in intensive care medicine The book also provides relevant background information e g statements by the Society of Critical Care Medicine and the Congregation for the Doctrine of the Faith It is accessible to theologians philosophers and health care professionals

Elisha Bartlett's Philosophy of Medicine William Stempsey,2005-06-14 The idea of preparing a new critical edition of Elisha Bartlett's Essay on the Philosophy of Medical Science was suggested to me several years ago by Dr H Tristram Engelhardt Jr Since that time it has been a pleasure to get to know the life and work of Elisha Bartlett I am pleased to be completing this book in the bicentennial year of Bartlett's birth Bartlett was born in 1804 in Smithfield Rhode Island less than twenty five miles from Worcester Massachusetts my present home a short journey even in Bartlett's day I have been able to walk at some of the sites to which Bartlett continually returned during his life Visiting Bartlett's grave in the Slatersville cemetery has been an inspiration for the preparation of this book Proximity to several institutions with rich holdings in Bartlett's works and in nineteenth century American history of medicine greatly facilitated my research First though I want to acknowledge the College of the Holy Cross for supporting my sabbatical leave for the academic year 2003 2004 The American Antiquarian Society in Worcester Massachusetts was generous in giving me access to its remarkable resources I was able to find many of Bartlett's published works and other nineteenth century medical literature there and the entire library staff provided quick and able research assistance

The Philosophy of Medicine H. Tristram Engelhardt Jr.,2000-07-31 The term bioethics was coined in 1971 just as interest in the medical humanities claimed a prominent place in medical education Out of this interest a substantial area of research and scholarship took shape the philosophy of medicine This field has been directed to the epistemological ontological and value theoretical issues occasioned by medicine and the biomedical sciences Bioethics is nested in this field and can only be fully understood in terms of the foundational issues it addresses This collection of essays in honor of Stuart F Spicker one of the individuals who gave shape to the philosophy of medicine lays out the broad scope of concerns from the philosophy of embodiment to issues of the role of ethics consultants to concepts of disease equity and the meaning of history

The Philosophical Diseases of Medicine and their Cure Josef Seifert,2012-11-02 At all times physicians were bound to pursue not only medical tasks but to reflect also on the many anthropological and metaphysical aspects of their discipline such as on the nature of life and death of health and sickness and above all on the vital ethical dimensions of their practice For centuries almost for two millennia however those who practiced medicine lived in a relatively clearly defined ethical and implicitly philosophical or religious world order within which they could safely turn to medical practice knowing right from wrong or at least being told what to do and what not to do Today however the situation has radically changed mainly due to three quite

different reasons First and most obviously physicians today are faced with a tremendous development of new possibilities and techniques which allow previously unheard of medical interventions such as cloning cryo conservation genetic interference etc which call out for ethical reflection and wise judgment but regarding which there is no legal and medical ethical tradition Traditional medical education did not prepare physicians for coping with this new brave world of modern medicine Secondly there are the deep philosophical crises and the philosophical diseases of medicine mentioned in the preface that lead to a break down of firm and formative legal and ethical norms for medical actions

Bioethics in Medicine and Society Thomas F. Heston, Sujoy Ray, 2021-05-19 Bioethics is the application of ethics to the broad field of medicine including the ethics of patient care research and public health In this book prominent authors from around the globe discuss the complexities of bioethics as they apply to our current world Topics range from the philosophical bioethics of the evolution of thinking about marriage from a religious standpoint to the bioethics of radiation protection to value based medicine and cancer screening for breast cancer Bioethics in Medicine and Society is wide ranging with additional chapters on the ethics of geoengineering complementary and alternative medicine and end of life ethical dilemmas Readers will find that the field of bioethics has broad implications throughout society from our most intimate interpersonal relationships to policies being implemented on a global scale

Infertility Kevin Wm. Wildes, 1996-12-31 Infertility A Crossroad of Faith Medicine and Technology brings together a diverse group of clinicians theologians and philosophers to examine the use of reproductive technologies in the light of the Roman Catholic moral tradition and recent teaching The book provides relevant background information e.g. Donum Vitae from the Congregation for the Doctrine of the Faith as it explores the psychological social legal and moral contexts of reproductive medicine This book is Volume 3 of Catholic Studies in Bioethics in the series Philosophy and Medicine

The Voice of Breast Cancer in Medicine and Bioethics Mary C. Rawlinson, Shannon Lundeen, 2006-07-15 Few diseases have made more difference to our understanding of illness the relation of the patient to the physician and other health care professionals and the social context of disease than breast cancer Breast cancer activism has provided a model of public policy advocacy for women as well as for sufferers from other diseases and even in causes unrelated to health In many ways it has become emblematic of issues in women's health This volume offers a discursive analysis of breast cancer From multiple perspectives historical philosophical psychological socio-political these essays explore the competing narratives that have made breast cancer a contested site It addresses debates about the autonomy of the patient in relation to the authority of the physician as well as the importance of patient narratives in understanding disease It analyzes the relation between the community and medical practice particularly with regard to the effect of breast cancer activists and feminists on the medical understanding and treatment of breast cancer And it questions the intersection of medical science with political institutions and agencies of public policy in determining priorities of research and strategies of treatment

[The Linacre Quarterly](#), 2004

Responsibility, God and Society Johan de Tavernier, 2008 A generation of students at the Faculty of Theology of

the K U Leuven have been introduced by Roger Burggraeve to the thoughts of Emmanuel Levinas 1905 1995 Levinas has been and still is for him a true master in thinking For Levinas responsibility is heteronomous because it does not start from the I but from the epiphany of the other as the face appealing to me not to kill but to promote him her In and through the appeal of the face the difference between the other and me expressed in the irreducible alterity of the other is ethically speaking the appeal to the highest non indifference proximity without absorption As Levinas thinking carries on obvious Jewish Talmudic imprint Burggraeve was interested as to how the concept of responsibility can be connected to a biblically inspired ethic In which way can the Levinasian view on responsibility enhance a Christian anthropology and in particular that one articulated by Louvain personalism and in its turn inspired by a Christian anthropology so that it benefits from uniquely Christian accents In this Festschrift for Roger Burggraeve authors explore the theme of Responsibility God and Society in order to answer two questions What does Levinas ethic of responsibility have to offer Christian theology And vice versa what can Christian theology offer to contemporary ethical thought on personal relational and societal responsibility

International Books in Print ,1997 Moral Acquaintances Kevin William Wildes,2000 The author of this text argues that the methodological issues in bioethics mirrors the experience of moral pluralism in a secular society The different methods that have been used in the field reflect the different moral views found in a pluralistic society **American Book Publishing Record** ,1995 **The British National Bibliography** Arthur James Wells,2000 **New Titles in Bioethics** ,1996 Subject Guide to Children's Books in Print 1997 Bowker Editorial Staff,R R Bowker Publishing,1996-09 **Revista médica de Chile** ,2003 **Medical and Health Care Books and Serials in Print** ,1997 **Subject Guide to Books in Print** ,1996 Allocating Scarce Medical Resources H. Tristram Engelhardt Jr.,Mark J. Cherry,2002-05-20 Roman Catholic moral theology is the point of departure for this multifaceted exploration of the challenge of allocating scarce medical resources The volume begins its exploration of discerning moral limits to modern high technology medicine with a consensus statement born of the conversations among its contributors The seventeen essays use the example of critical care because it offers one of the few areas in medicine where there are good clinical predictive measures regarding the likelihood of survival As a result the health care industry can with increasing accuracy predict the probability of saving lives and at what cost Because critical care involves hard choices in the face of finitude it invites profound questions about the meaning of life the nature of a good death and distributive justice For those who identify the prize of human life as immortality the question arises as to how much effort should be invested in marginally postponing death In a secular culture that presumes that individuals live only once and briefly there is an often unacknowledged moral imperative to employ any means necessary to postpone death The conflict between the free choice of individuals and various aspirations to equality compounds the challenge of controlling medical costs while also offering high tech care to those who want its possible benefits It forces society to confront anew notions of ordinary versus extraordinary and proportionate versus disproportionate treatment in a

highly technologically structured social context This cluster of discussions is enriched by five essays from Jewish Orthodox Christian and Protestant perspectives Written by premier scholars from the United States and abroad these essays will be valuable reading for students and scholars of bioethics and Christian moral theology Bibliography of Bioethics LeRoy Walters, 1975
