Critical Communications Review Volume 1 Labor The Working Class And The Media Critical Communication Review:

The Critical Communications Review: Labor, the working class, and the media Vincent Mosco, Janet Wasko, 1983
Labor, Class Formation, and China's Informationized Policy of Economic Development Yu Hong, 2011-03-31 In *Labor Class Formation and China's Informationized Policy of Economic Development* Yu Hong examines crucial connections between the evolving political economy of information and communications technology ICT and the reconstitution of class relations in China. Situating China's ICT development over the last thirty years at the intersection of transnational trends, domestic policies and institutional arrangements, Hong shows how evolving class relations in the ICT sector are shaped by and shaping the transnational capitalist dynamics and domestic socio-economic transformations. She goes on to argue that the huge and still expanding pool of Chinese ICT workers and their newly attained identities as wage labor rather than consumers constitute a missing but important dimension of human experiences of the rise of the information society.

The Handbook of Communication History Peter Simonson, 2013 The *Handbook of Communication History* addresses central ideas, social practices and media of communication as they have developed across time, cultures and world geographical regions. It attends to both the varieties of communication in world history and the historical investigation of those forms in communication and media studies. The Handbook editors view communication as encompassing patterns, processes and performances of social interaction, symbolic production, material exchange, institutional formation, social praxis and discourse. As such, the history of communication cuts across social, cultural, intellectual, political, technological, institutional and economic history. The volume examines the history of communication, the history of ideas of communication, the history of communication media and the history of the field of communication. Readers will explore the history of the object under consideration, relevant practices, media and ideas, review its manifestations in different regions and cultures, comparative dimensions and orient toward current thinking and historical research on the topic, current state of the field. As a whole, the volume gathers disparate strands of communication history into one volume, offering an accessible and panoramic view of the development of communication over time and geographical places and providing a catalyst to further work in communication history.

Critical Communications Review Vincent Mosco, Janet Wasko, 1984 This volume of *The Critical Communications Review* examines the shifting strategies of control over information and communication resources. The articles explore the consequences of the ongoing restructuring of communication systems as critical researchers examine the role of information in the revitalization of the capitalist system in new and evolving forms of social and political control and in the reshaping of the cultural sphere.
