*Epigonism and the Dynamic of Jewish Culture* Shlomo Berger, Irene E. Zwiep, 2008 The articles collected in this volume were originally presented at a summer colloquium in Oxford in 2004 The epigone is generally believed to be an imitator deprived of an independent original talent He necessarily follows in someone else's footsteps a source of inspiration that can or indeed must be identified The epigone can operate only after a certain span of time during which he has studied his example and learned how to follow in his master's footsteps An epigone is always influenced by it consciously or unconsciously by another person or by the surrounding cultural climate The epigone is per definition second rate Furthermore it is believed that the epigonic product cannot have an independent value Its only value lies in demonstrating a condition in culture a spirit of the area a trend in the arts philosophy or any other human occupation Rather than continuing to view epigonism as a natural if regrettable part of the cultural process an inevitable secondary stage within the development of any corpus the essays in this volume approach the phenomenon from a

perspective that is at once more neutral and more positive They do so not by rehabilitating the quality of the epigone's output but by redefining his role within the cultural process per se In each of these contributions epigones appear as the true carriers of in this case Jewish culture Rather than mere witnesses or at best historical mirrors of primary canonical cultural codes and modes they represent one of the dynamic forces within the development of a culture For the epigone is not merely imitating but also disseminating It is not the isolated peaks of the cultural panorama that the articles in this book seek to map out but the modest planes that allow us to travel the landscape in the first place
