Bruce Bushong, 2014-12-04 Ever since the horrors of 9 11 Brian had been lost His quest for purpose led him to France in the spring of 2003 There everything changed when he joined with fellow seekers Katrina a German physicist Hadji an Indian engineer Alia a Brazilian pilot and Qui Jen a Japanese ninjas part of the Holistic Group dedicated to the transformation of the planet through the creation of Critical Mass As foretold in ancient texts Critical Mass is both a beautifully simple and incomprehensibly complex concept for change To achieve this rare state 3 511 people must be trained to come together in a single thought If this can be accomplished that one thought will manifest as a new reality a self aware planet a Global Brain Brian is challenged to accept the responsibilities of the Uniter the one who would come and start the world anew But the Monarchists a group with considerably less philanthropic goals have vowed to stop at nothing to ensure that their vision is the one that comes to pass The first group to achieve Critical Mass will win the planet In order to realize his spiritual potential to save humanity Brian and his crew travel the world in search of knowledge to use the Tree of Life an ancient map of consciousness Can they achieve their goals before the Monarchists achieve theirs Only time and fate will tell Critical Mass Daniel Suarez, 2023-01-31 In New York Times bestselling author Daniel Suarez s latest space tech thriller a group of pioneering astropreneurs must overcome never before attempted engineering challenges to rescue colleagues stranded at a distant asteroid kicking off a new space race in which Earth s climate crisis could well hang in the balance When unforeseen circumstances during an innovative and unsanctioned commercial asteroid mining mission leave two crew members stranded those who make it back must engineer a rescue all while navigating a shifting web of global political alliances and renewed Cold War tensions With Earth governments consumed by the ravages of climate change and unable to take the risks necessary to make rapid progress in space the crew must build their own nextgen spacecraft capable of mounting a rescue in time for the asteroid s next swing by Earth In the process they ll need to establish the first spin gravity station in deep space the first orbiting solar power satellite and refinery and historic infrastructure on the moon s surface all of which could alleviate a deepening ecological political and economic crisis back on Earth and prove that space based industry is not only

profitable but possibly humanity's best hope for a livable peaceful future *Critical Mass* Philip Ball, 2006-05-16 Ball shows how much can be understood of human behavior when we cease to predict and analyze the behavior of individuals and instead look to the impact of individual decisions whether in circumstances of cooperation or conflict on our laws institutions and customs **The Critical Mass in Collective Action** Gerald Marwell, Pamela Oliver, 1993-03-26 The problem of

collective action is that each group member wants other members to make necessary sacrifices while he or she free rides reaping the benefits of collective action without doing the work Therefore no one does the work and the common interest is not realized This book analyses the social pressure whereby groups solve the problem of collective action Critical Mass Dinur Blum, Christian Jaworski, 2021-09-27 This book examines social patterns in 2 000 mass shootings in the United States between 2013 through 2020 While mass shootings are often described as psychological the authors show that there are social factors that produce the anger needed to commit a mass shooting These factors are fairly common and can be addressed to stem the anger earlier The factors include chronic poverty sudden unemployment relationship problems domestic violence social isolation and alcohol Common social strains can metastasize and be lethally dangerous By understanding the social factors we can reduce the anger and frustration people feel that would drive them to killing others

Cyclescapes of the Unequal City John G. Stehlin, 2019-10-01 A critical look at the political economy of urban bicycle infrastructure in the United States Not long ago bicycling in the city was considered a radical statement or a last resort and few cyclists braved the inhospitable streets of most American cities Today however the urban cyclist represents progress and the urban renaissance City leaders now undertake ambitious new bicycle infrastructure plans and bike share schemes to promote the environmental social and economic health of the city and its residents *Cyclescapes of the Unequal City* contextualizes and critically examines this new wave of bicycling in American cities exploring how bicycle

infrastructure planning has become a key symbol of and site of conflict over uneven urban development John G Stehlin traces bicycling's rise in popularity as a key policy solution for American cities facing the environmental economic and social contradictions of the previous century of sprawl Using in depth case studies from San Francisco Philadelphia and Detroit he argues that the mission of bicycle advocacy has converged with and reshaped the urban growth machine around a model of livable environmentally friendly and innovation based urban capitalism While advocates envision a more sustainable city for all the deployment of bicycle infrastructure within the framework of the neoliberal city in many ways intensifies divisions along lines of race class and space Cyclescapes of the Unequal City speaks to a growing interest in bicycling as an urban economic and environmental strategy its role in the politics of gentrification and efforts to build more diverse coalitions of bicycle advocates Grounding its analysis in both regional political economy and neighborhood based ethnography this book ultimately uses the bicycle as a lens to view major shifts in today's American city Critical Mass Mario Murillo,1997
