**Critical Thinking and the Academic Study of Religion** Richard Penaskovic,1997 Originally Published by Scholars Press Now Available from Duke University Press This work responds to a renewed emphasis on teaching in the academy Written from the perspective of a classroom teacher it is a practical application of the principles behind the critical thinking movement to the study of religion Emphasizing that the acquisition of critical thinking depends less on what is taught than on how it is taught the author presents concrete examples from his own experience to illustrate a student centered approach to teaching By demonstrating how the study of religion contributes to the development of critical thinking through the acquisition of problem solving decision making and metacognitive skills Penaskovic suggests its value to a broader liberal arts

curriculum as well Both a theoretical view of critical thinking and a nuts and bolts manual on how it can be used and assessed in the classroom this work will challenge new and veteran teachers alike to reexamine and renew what they do in the classroom
